Manufactured in greater numbers than any other Messerschmitt 109 variant, the G-6 has always been very popular with the modelers considered to be the classic Bf 109 by many. Luftwaffe pilots complained the *Beule* or bumps covering the breaches of the MG 131 13 mm machine guns reduced speed, nevertheless, they contribute to the distinctive personality of the Bf 109. Too the bigger guns were heavier affecting performance.

**For accurate color reference we recommend the Luftwaffe Color Chart published by Eagle Editions Ltd. featuring paint chips prepared by Warnecke and Böhm available from your local hobby shop or Eagle Editions Ltd.**

“White 3” of Uffz. Frans Stadler 7./JG 27, with unusual camouflage pattern of RLM 75/RLM 74. The underwing cannons are visible. White 1/3 segment on the spinner is barely visible.

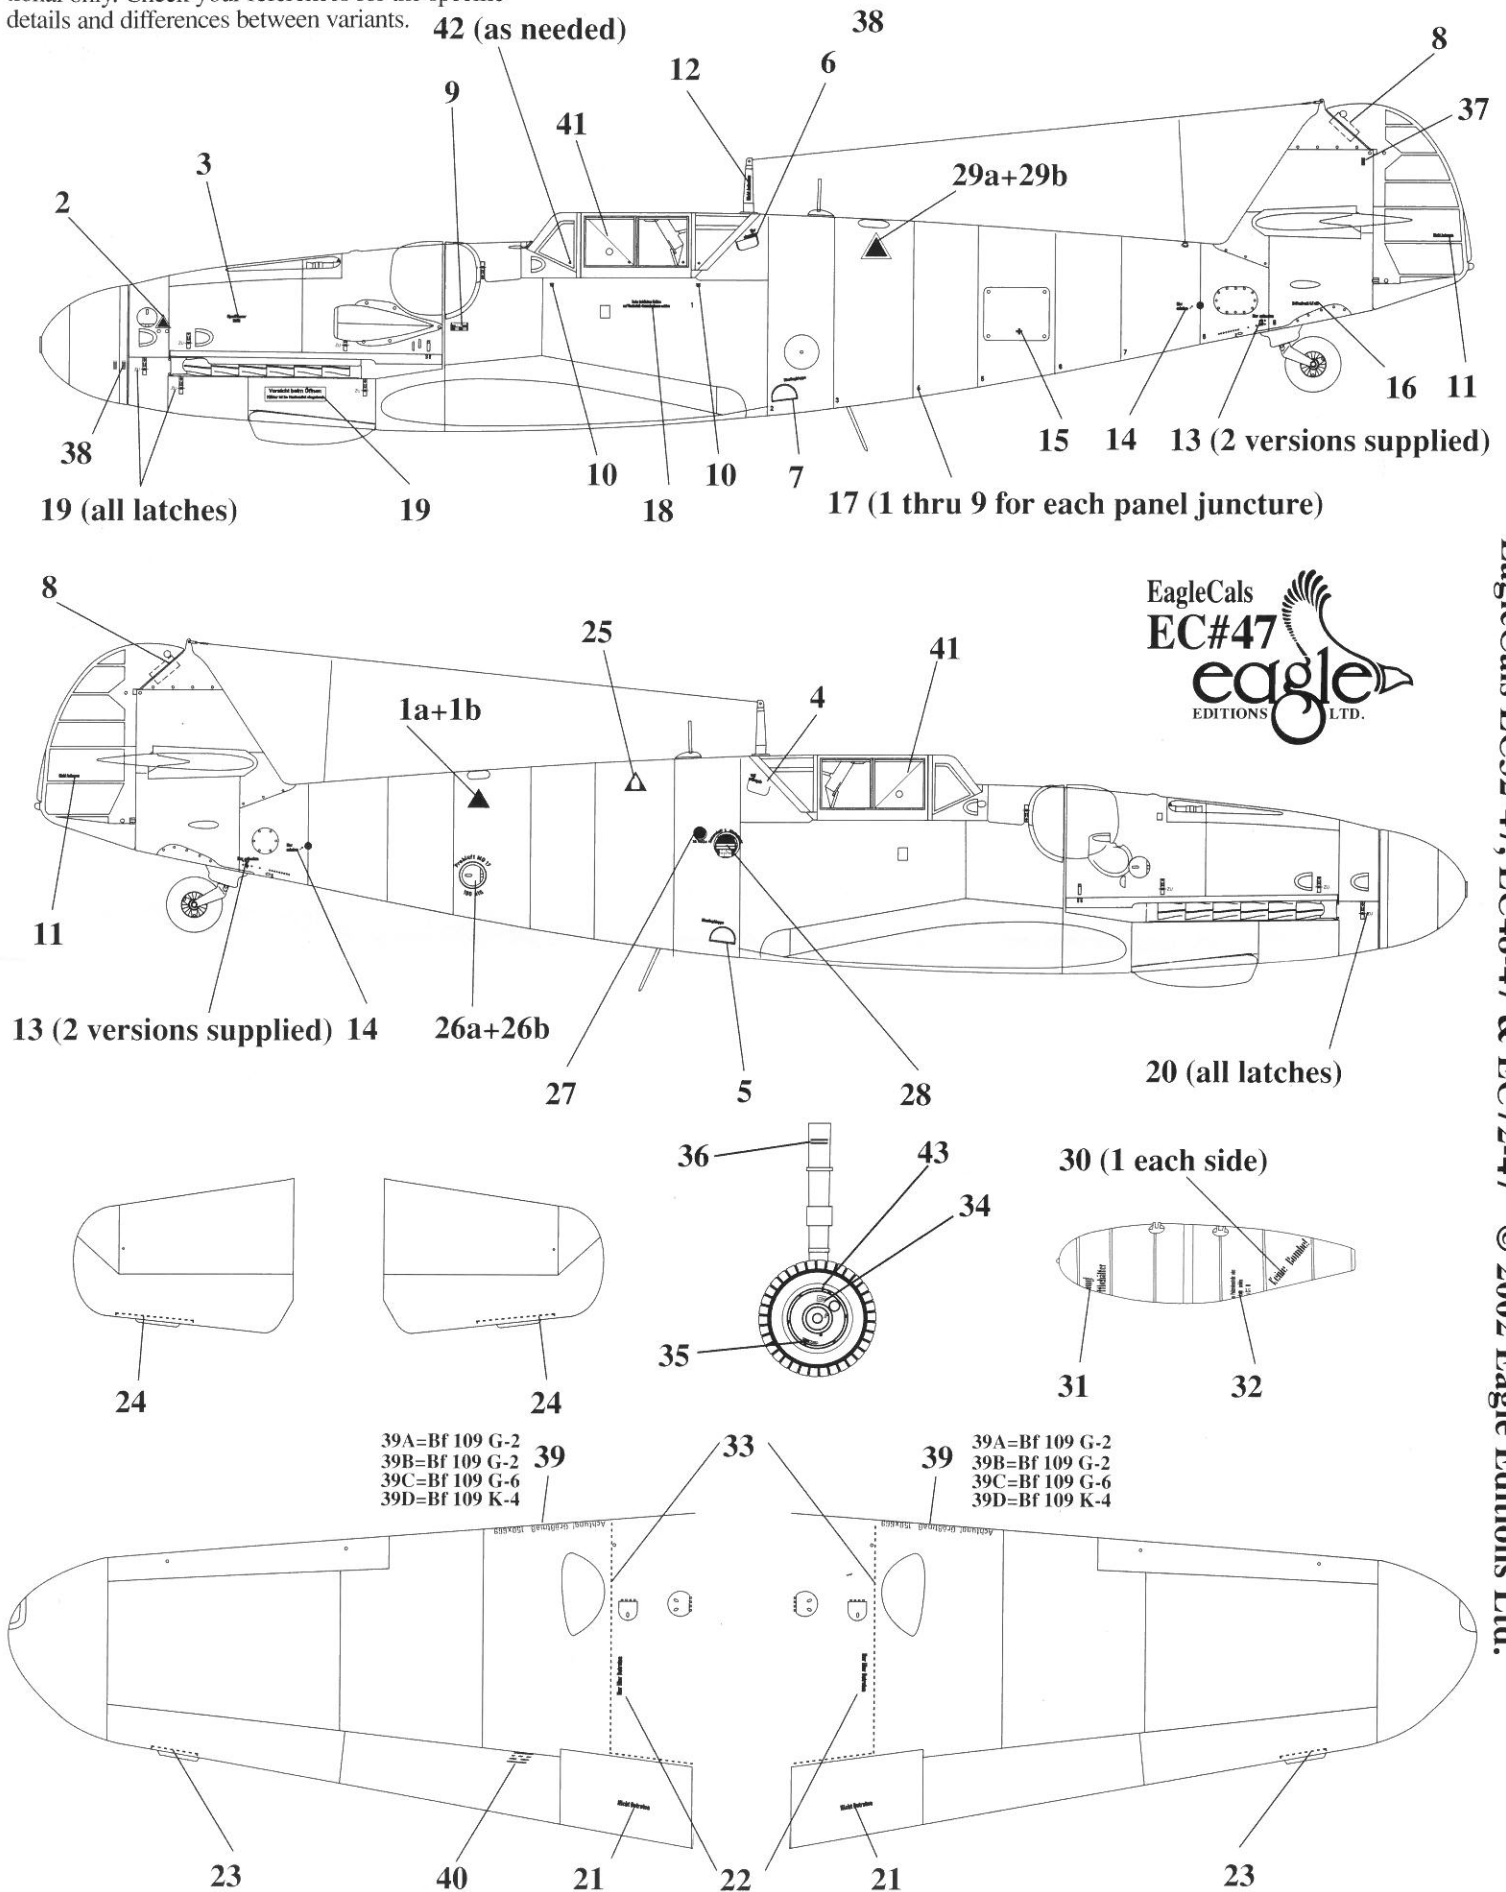

Close-up showing this unusual large spots of RLM 74/RLM 75 and the fuselage. The slightly larger than standard (900 mm) White outline fuselage cross is interesting.

Another view of the cockpit area illustrating the large spots and the unusual number ‘3’. Note the flares around Stadler’s waist.

NOTE: Stencil diagram drawings are representational only. Check your references for the specific details and differences between variants.

The tropical filter and lack of umbrella holders can be seen. Note the factory data plate. The gun camera aperture on the port wing is capped over.

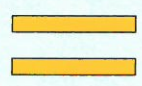

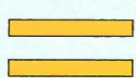

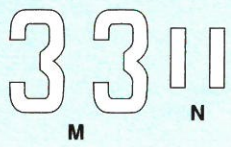

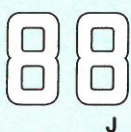

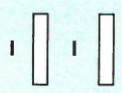

## “Yellow 13” II./JG 51

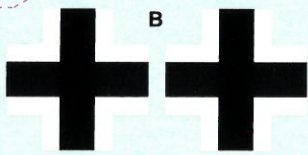

“Yellow 13”, G-6 trop of II./JG 51 now in American custody. The tropical filter and umbrella holders are clear. Note the White II. *Gruppe* bar in front of the number ‘13’ typical of II. *Gruppe* JG 51. No DF loop antenna or base. JG 51 Hawk’s head emblem may have been painted over on the port cowl. The fin tip has been replaced from another aircraft with a different sized *Hakenkreuz*. No 20 mm cannon gondolas installed in this image but were used at times as profile illustrates.
