Pl. I  
Post Korean War Sabres

Suggested Kit: Hasegawa F-86F-40JASDF.

F-86 F, s/n 52-4538 of the 311 FBS, Osan, Korea, 1957. Natural metal finish overall, with Red nose, canopy frame and fin/rudder band, Black lightnings and White stars. Full Yellow ID bands.

F-86 F s/n 52-4329, of the 310 FBS, Osan, Korea, 1957. Natural metal finish overall, with Yellow nose, canopy frame and fin/rudder band with Black lightning and White stars. Full Yellow ID bands.

**NOTE:**

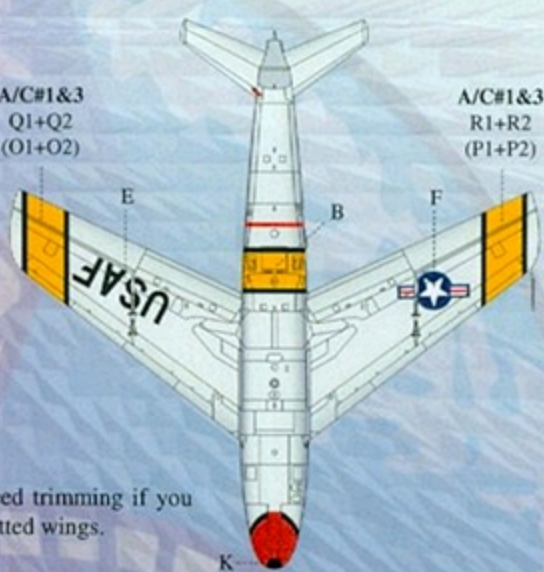

Both of these A/C had the long-40 wings as found on the JASDF A/C. Use the Hasegawa F 86 F-40 kit.

**NOTE:**

Modeller must match and paint the Yellow and Red nose sections prior to decaling. Plan ahead!

**NOTE:**

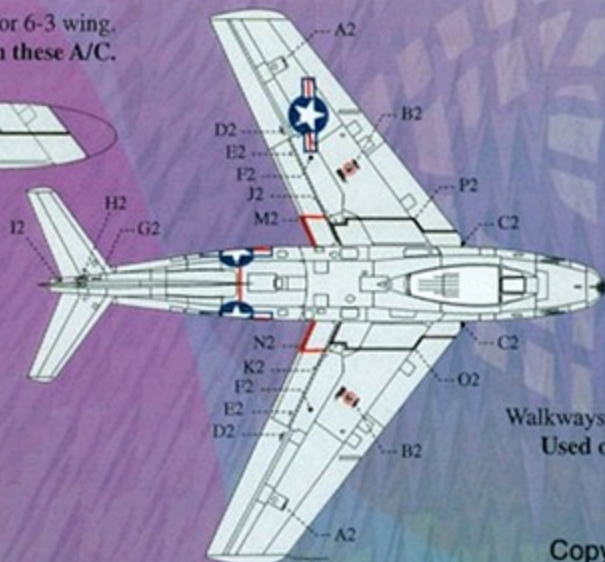

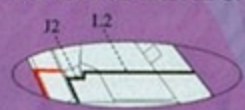

The nose lightning decal is a little oversize on the bottom section. These extra 1-2 mm. will allow you to use any F-86 kit you may want to use. They are all slightly different. Apply the decal, and while still wet, "CAREFULLY" using a "new" blade, cut the wheel well area to size.

Wing band will need trimming if you convert them to slatted wings.

**STENCILS**

Walkways for 6-3 wing. Not used on these A/C.

Walkways for slatted wing. Used on these A/C.
