

F-117A Back from the Dead

48-279
MSRP \$16.00 US

622 Northwood Trail
Southlake, TX 76092

WHAT'S OUT THERE?

- 1/48th Tamiya F-117A
- 1/48th Italeri F-117A
- 1/48th Academy F-117A

The Nighthawk is back! The last couple of years we've seen these three AC flying simulated cruise missile missions in support of numerous training events in the US. These aircraft were seen supporting training missions in Fresno, CA and in support of the Savannah Sentry event in Georgia. We've captured these aircraft in their up to date markings and added a couple of bonus subjects along the way.

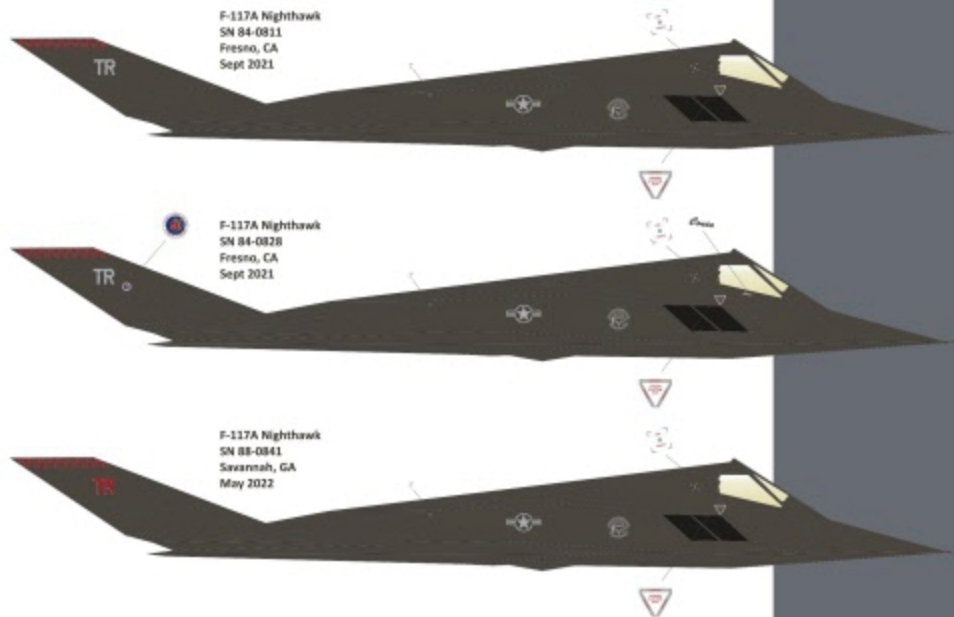

There is also an F-117A from Palmdale, CA that was finished in a grey RMM coating during the early days of the program. This was a Lockheed Martin flyable spare, date frame unknown.

Two previously released Grey Dragon schemes that were deployed out to Holloman AFB in the mid-2000's are also on this sheet.

Special thanks to Anthony Wan, Mike Killian and Mike Valdez for their assistance on this sheet.
