

RECOMMENDED KIT: Airfix 727-200 in 1/144. Hasegawa 727-200 in 1/200.

PAINTING: Refer to the photographs for complete marking information. Paint the entire fuselage white. When using the white fin logos, paint the fin bright red (two white logos are provided for each side for increased opacity). The wings and tailplanes appear in the standard light gray and natural metal patterns (please note that wing and tailplane center section decals for the 727-200 are available from Flightpath as FP44-136 and FP20-98). The engines are white, with a natural metal lip and burnt metal exhausts.

DECAL APPLICATION: Pay close attention to window location and spacing when applying the fuselage titles. The double-letter fleet number is positioned on the forward portion of the nose gear doors. The large wing registration should be positioned on the lower left wing. With regard to the flag, the half-moon faces towards the rear and is positioned forward of the titles on both sides of the fuselage. The aircraft names are centered on the nose, just below the windshield. This decal sheet possesses a constant clear. Therefore, cut each piece out individually before soaking in water.

REGISTRATION NUMBERS: The following registration numbers are all 727-200s: TC-JCK / ERCIYES, TC-JEC / YESILADA, TC-JBF / ADANA, TC-JBG / YAVRUVATAN, TC-JBJ / BESPARMAK, TC-JBM / MENDERES, TC-JCA / EDIRNE, TC-JCB / KARS, TC-JCD / SINOP, and TC-JCE / HATAY. Note that TC-JCA is now a dedicated freighter (with no passenger cabin windows) and carries the large cargo door on the left side of the forward fuselage with additional "CARGO" titling. Thank you for buying this Flightpath decal. If you have any questions or comments, please feel free to drop us a line at Aerocolours Graphics, P.O. Box 9518, San Bernardino, CA 92427-0518; or by fax at (909)-882-4739. Ask for our free catalog.
