MODELS

1/32 SCALE
Rudder slot is too long on the Revell 1/32 by 1.5mm and should be filled so it does not conflict with the correct shape of the "Idaho" band.

1/32 SCALE
At the time of release of this decal set the F4G could only be made by modifying the under nose fairing and vertical tail fairing from the Revell F4F and F4E kits. Aftermarket resin update sets to make an F4G and HARM missiles are available from aftermarket resin update firms such as TAC Scale Dynamics.

Apply neutral gray decal over gunship gray numbers.

Note: #551 carried the "1975 BOISE PHAREWELL 1996" on the starboard side only.

Apply clear matt finish to walkways. Walkways should also be given a more weathered appearance

REMOVE DECAL CLEAR CARRIER ALONG EDGE

REMOVE DECAL CLEAR CARRIER ALONG EDGE

Neutral gray and gunship gray decals matched to actual paint chips.

NOTE: During the last few years in service, Idaho F4G aircraft did not carry most other stencils other than around the cockpit.

Also note the formation light strips on these aircraft appear as a solid strip.
