

MICROSCALE DECAL NUMBER 48-252

MIKOYAN MIG-21

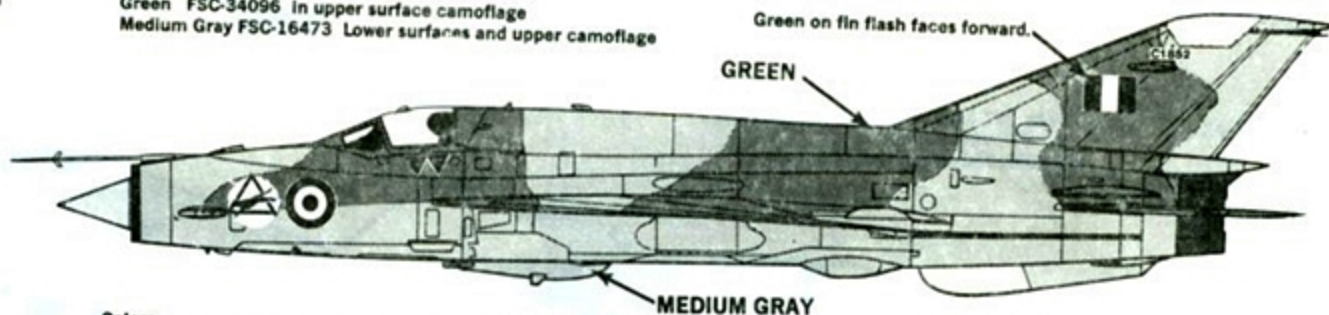

Note: Color are visual and camouflage schemes are best interpretations, because complete data on Russian aircraft is scarce and some of this data was interpreted from black and white photographs.

Radomes and antenna panels occur in a number of colors. Green predominates but Dark and Light Gray have been observed in color photographs.

National insignia appears in six positions on all aircraft unless noted.

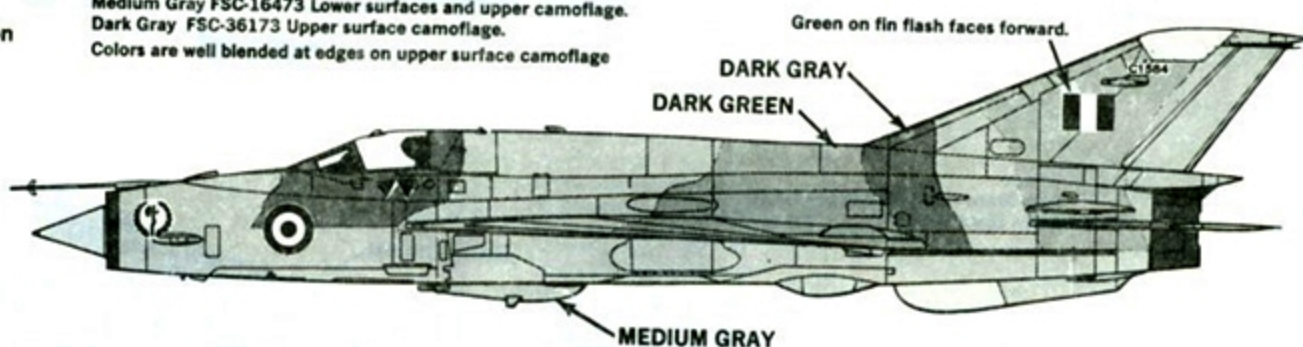

Mig-21MF C1852
37 "Panther" Squadron
Indian Air Force

Colors:
Green FSC-34096 in upper surface camouflage
Medium Gray FSC-16473 Lower surfaces and upper camouflage
