F-14D (R) BuNo. 159630, F-14A rebuilt to D standards, '101' of VF-2, USS Constellation, 1996. Upper surfaces Gloss Light Gull Gray, lower surfaces Gloss White. A/C photographed at the Oceana Air Show, Sep 21, 1996, celebrating the 25th anniversary of VF-2. Notice double IR seeker under the nose(only on F-14D's). Notice upper stabilizers are not White.

F-14B, #101 of VF-103 'Jolly Rogers' as photographed at NAS Key West during a gunnery exercise. In addition to the specific stencils provided, the aircraft apparently carried minimal standard stenciling, and generally had a very patchy finish due to repainting.

Another F-14B of VF-103, but at a different time, and serving aboard the USS Enterprise. Markings are the same as above, including pilots and ground crew, but with a splendid Christmas motif on vertical stabilizers. Your Choice!
