WARNING

Special thanks to Capt. Todd Pearson of the 390th FS for the reference information for all these aircraft.

Capt. Todd Pearson of the 390th FS shares a chuckle with his father, Gen. Doug Pearson before flying A/C 76-0084 with the Florida ANG. This was the same aircraft Gen. Pearson piloted on his historic ASAT mission on 13 Sept. 1985. During this mission, Gen. Pearson destroyed the Solwing P78-1 solar observatory with an ASM-135 Anti-satellite missile.

Twobobs' goal is to provide you with the most thoroughly researched decals that money can buy. We go beyond using traditional reference resources and many times speak with the actual aircrews and maintainers of our subject matter. Being modelers ourselves, we understand that there is no substitute for this painstaking research and we are proud to offer, what we feel, are the best decals on the market. If you have any subject matter that you feel should be the next Twobobs creation, let us know. We'll be happy to listen to any and all customer input.
