Overall Desert Pink

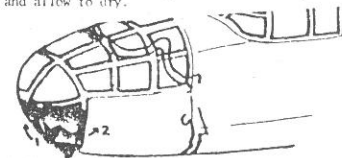

B-25C
499th B.S. 5th AF
Olive Drab uppersurfaces.
Neutral Gray lowersurfaces.

Paint entire nose olive drab and gray and apply decals.
Apply nose decals in this order: top, right side, left side, top nose, bottom nose, wings.

STEP THREE-
Apply top nose decal. Wrap sides around nose first then fold down center piece. Use setting solution and allow to dry.

STEP FOUR-
Apply bottom nose, applying center section first then folding outer section around nose contours. Use setting solution. When dry, apply wings and mission marks.

STEP ONE-
Apply decal over nose. Use setting solution and slit decal with sharp modelling knife where necessary. Allow to dry. Note: cut clear film away from all mating surfaces of all decals.

STEP TWO-
Apply decals to side of nose. Use setting solution and slit decal with sharp modelling knife where necessary. Allow to dry.

Nose of aircraft was modified with four machine guns in place of bombardier' position.
Engine cowling decals in four parts. Paint front of cowling blue match.
