Green Nose Mustangs of East Wretham

PART VI

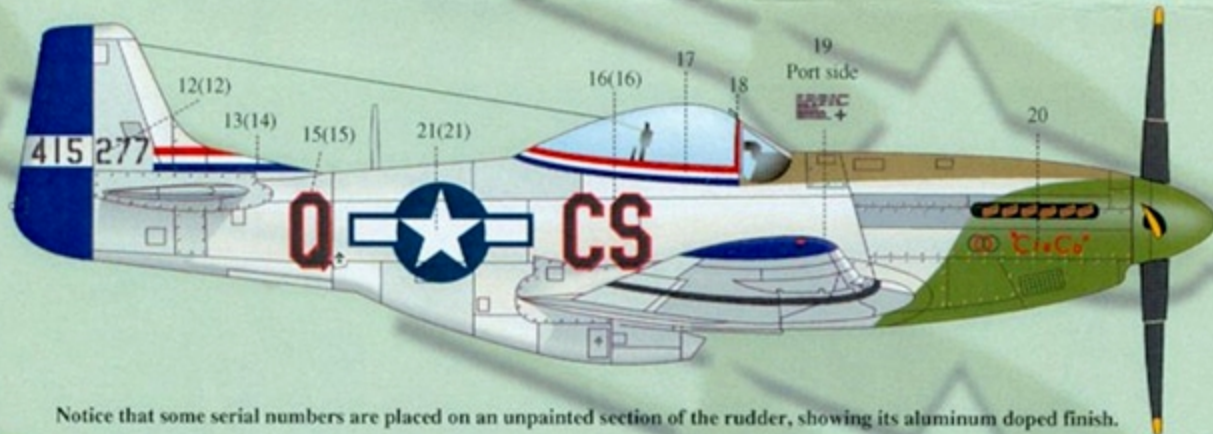

Suggested Kit: TAMIYA 1/48 scale Mustang Family.

Aircraft 1 - P-51D-10 'Pauline'. Lt. Lee Patton, East Wretham, February 1945. Natural Metal finish, Red rudder. A/C was lost on February 28, 1945, while flown by 369 F.S. Commanding officer, Major Edwin Pezda.

Aircraft 2 - P-51D-20 'Kitten'. Lt. George Long, Jr., East Wretham, January 1945. Natural Metal finish, Yellow canopy frame leading edge gun panels and rudder. The name Kitten (decal 7) may have had a Yellow border. Your choice! (photo page 117, reference 3). Pilot flew from Dec. of 44 to Sept. of 45, destroying one locomotive and shared eight more. A/C crash landed during take off on January 16, 1945, killing Lt. D.A. Mac Lean during his first operational take off. Kitten had a very dirty fuselage insignia, but we do not believe it was Grey.

Aircraft 3 - P-51D-15 'CisCo'. East Wretham, Autumn 1945. Natural Metal finish, Insignia Blue wing tips and rudder. On Tamiya kit, apply decal 17 to canopy frame, then trim and attach clear part, then apply decal 18. No other information is available on this aircraft.

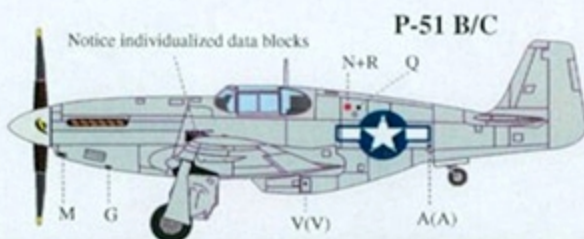

Notice that some serial numbers are placed on an unpainted section of the rudder, showing its aluminum doped finish.

Do you want to get more out of your modeling? We invite you to read more interesting stories and facts about these and other A/C of this unit in our suggested references.

Why just building one A/C Model instead of a collection of these as well as other units featured is the AMD/ESP Range? Why not adding a little of history to your hobby? Units like the Blue Nose Bastards, the 353rd Checker Noses, Checkertails, the 357 FG (Red/Yellow checker noses), the 405 FG and others featured in our extensive decal line. Little touches like these will make the difference between a collection of models and a classic collection.

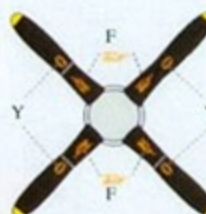

Visit our Web site and enjoy the thousands of choices we offer you for your enjoyment. Remember, experience the difference with AMD/ESP.
