© Cutting Edge Modelworks, 2004

Yellow 2

- The bird emblem appeared on both sides of the fuselage.

White 11

- Note the unusual camouflage consisting of RLM 70 & 71 overpainted with 02.
- This 'E-1' has been retrofitted with a late square type canopy.

White 5

- Note the previously applied red stripe beginning to bleed through the white painted cowl.
- The swastika has been painted out for an unknown reason.

Yellow 5

- We do not know if the pilot's name was repeated on the right hand side or not.

Applying the Decals

You probably already know all this stuff, so feel free to use your regular process; however, if you're new to aftermarket decals, here goes:

- Generally, use the Microscale Finishing System. We don't recommend extremely strong decal solvents such as Solvaset.
- Your model must have a smooth, glossy surface, as decals won't adhere well to matte surfaces. Use gloss paints or your favorite clear gloss overspray over matte or semigloss paint.
- Cut each subject out without trimming off the slight excess film (this helps the decal film disappear when dry).
- Put the decal in warm water that has a drop or two of liquid dishwashing soap or photo-flo for 10 seconds.
- When the decal will slide off the backing paper without forcing it, apply it to the proper position on your model. Slide the backing paper out from underneath.
- Gently blot off excess water and smooth out bubbles under the decal surface. If you wish, carefully brush on a mild decal softener such as Micro-Sol.
- When all decals are completely dry, gently wash off all excess decal adhesive.
- Finally, overcoat your model with a good quality gloss coat, followed by your choice of matte or eggshell clear topcoat.

FS 595 Color Cross Reference

RLM 02	Xtracolor X201, Floquil 303271, Polly Scale 505075
RLM 04	Xtracolor X213, Floquil 303269, Polly Scale 505017
