Bf 110 upper pattern views and colors are subject to much interpretation and speculation. Modelers should consult references and make their assumptions based on material available at this time.

# EagleCals #118

## Messerschmitt Bf 110 C/D Zerstorer

While designed for use with the Dragon 1/32nd scale Bf 110, they may also be adapted to the Revell Bf 110 kit.

For 1/48th scale Eduard or Fujimi, 1/72 Fujimi kits are suggested.

Note the upper surface schemes provided here are representative of early factory patterns and may not reflect those actually applied. Upper surface patterns and colors are difficult to determine for this type, consult available references and photos in order to conclude proper patterns and colors.
