Ponte Pegaso Airborne assault

Nella notte tra il 5 ed il 6 giugno 1944, durante le prime fasi dell'operazione Overlord, la 6^a Divisione Aviotrasportata Britannica ricevette l'obiettivo di catturare il ponte mobile sul fiume Orne, vicino alla città di Ouistreham in Normandia. Il controllo del ponte, chiamato "Pegasus" in codice, costituiva infatti un elemento fondamentale per rendere sicuro il fianco orientale dello scenario operativo e prevenire un possibile contrattacco delle truppe corazzate tedesche che potevano raggiungere il punto di sbarco a Sword Beach. I paracadutisti britannici, a bordo degli alianti Horsa, atterrarono nei pressi del ponte ed ebbero la meglio, grazie ad un'azione rapida ed efficace, delle truppe tedesche a difesa del ponte. Ancora oggi il Pegasus Bridge costituisce un punto di riferimento per tutti coloro che visitano i luoghi più significativi di Overlord.

Pegasus Bridge Airborne assault

In der Nacht vom 5. auf den 6. Juni 1944 erhielt die 6. Division Luftbewegliche Kräfte von Großbritannien während der ersten Phasen der Operation Overlord den Befehl, die Wippbrücke zu erobern, die in der Nähe der Stadt Ouistreham in der Normandie über den Fluss Orne führte. Die Kontrolle über diese Brücke, in der Folge „Pegasusbrücke“ genannt, war in der Tat ein entscheidender Schritt zur Sicherung der Ostflanke der Invasionstruppen und zur Verhinderung eines Gegenangriffs durch die deutschen Panzerdivisionen, die den Landepunkt in Sword Beach erreichen konnten. Die britischen Fallschirmspringer an Bord der Gleitflugzeuge Horsa landeten in der Nähe der Brücke und schafften es, mit einer schnellen und effizienten Aktion die an der Brücke stationierten deutschen Wachmannschaften in die Flucht zu schlagen. Die Pegasusbrücke ist heute noch ein Bezugspunkt für alle, die die wichtigsten Orte der Operation Overlord besichtigen möchten.

Pegasus Bridge Airborne assault

En la noche entre el 5 y el 6 de junio de 1944, durante las primeras fases de la operación Overlord, la sexta División Aerotransportada Británica recibió el objetivo de tomar el puente móvil sobre el río Orne, cerca de la ciudad de Ouistreham en Normandía. El control del puente, cuyo nombre en código era "Pegasus", fue, de hecho, un elemento fundamental para poner a salvo el flanco oriental del escenario operativo y prevenir un posible contraataque de las tropas acorazadas alemanas, que podían alcanzar el punto de desembarco en Sword Beach. Los paracaidistas británicos, a bordo de los planeadores Horsa, aterrizaron cerca del puente y obtuvieron ventaja, gracias a una acción rápida y eficaz, con respecto a las tropas alemanas que defendían el puente. Aún en la actualidad, el Pegasus Bridge es un punto de referencia para todos aquellos que visitan los lugares más emblemáticos de Overlord.

Pegasus Bridge Airborne assault

On the night between 5th and 6th June 1944, during the early stages of the Operation Overlord, the 6th British Airborne Division received the goal to capture and control the movable bridge that crossed the Orne River near the city of Ouistreham in Normandy. The control of the bridge, renamed in code "Pegasus" was a key point to make secure the eastern flank of the operational scenario and to prevent German armour troops counterattack that could reach the Allied landing area at Sword beach. The British paratroopers, in Horsa gliders, landed near the bridge and, thanks to a rapid and effective action, defeated the German troops that defended the bridge. Even today the Pegasus Bridge is a point of reference for all those who visit the most significant places of "Overlord".

Pegasus Bridge Airborne assault

Dans la nuit du 5 au 6 juin 1944, au début de l'opération Overlord, la 6^e division aérienne britannique reçut comme objectif l'ordre de capturer le pont mobile sur l'Orne, près de la ville d'Ouistreham en Normandie. Le contrôle du pont, dont le nom de code était « Pegasus », était un élément fondamental pour sécuriser le côté oriental du scénario opérationnel et empêcher une éventuelle contre-attaque des troupes cuirassées allemandes qui pouvaient atteindre le point de débarquement à Sword Beach. Les parachutistes britanniques, à bord des planeurs Horsa, atterrissent près du pont et, grâce à une action rapide et efficace, ils battirent les troupes allemandes qui défendaient le pont. De nos jours encore, le pont Pegasus est un point de référence pour tous ceux qui visitent les lieux les plus importants d'Overlord.

Pegasus Bridge Airborne assault

В ночь с 5 на 6 июня 1944 года на первых этапах операции «Оверлорд» (или Нормандская операция) 6-я британская воздушно-десантная дивизия получила задание захватить мост через реку Орн, недалеко от города Уистрэм в Нормандии. Контроль над мостом, получившим кодовое название «Пегас», являлся основным элементом операции, обеспечивая безопасность по восточному флангу оперативным военным действиям и предотвращая возможность контратаки немецких бронетанковых войск в случае прорыва их к месту высадки союзников на пляже «Сорд». Британские парашютисты, слетавшиеся на планерах Хорса недалеко от моста, благодаря эффективным и быстрым действиям, сумели отвоевать мост у немецких военных. Мост «Пегас» (Pegasus Bridge) и сегодня является ориентиром для всех тех, кто посещает известные места операции «Оверлорд».

ATTENZIONE - Consigli utili

Prima di iniziare il montaggio, studiare attentamente il disegno. Staccare con molta cura i pezzi elettrici, usando una testa calabrese o un paio di forbici e togliere con una piccola lama o un paio di vetri ogni eccesso spazzatura. Mai afferrare i pezzi con le mani. Montare seguendo l'ordine della numerazione delle tavole. Eliminare dalla stampata il numero del pezzo appena montato, facendogli sopra una croce. Le frecce nere indicano i pezzi da incollare, le frecce bianche indicano i pezzi da montare senza colla. Usare solo colla per polistirolo. A - B - C ... Le lettere ai lati dei numeri indicano la stampata ove si trova il pezzo da montare. I pezzi sbarrati da una croce non sono da utilizzare.

ACHTUNG - Ein nützlicher Rat!

Vor der Montage die Zeichnung aufmerksam studieren. Die einzelnen Montageteile mit einem Messer oder einer Schere vom Spritzring sorgfältig entfernen. Eventuelle Grate werden mit einer Klinge oder feinem Schmiergelpapier beseitigt. Keinesfalls die Montageteile mit den Händen entfernen. Bei der Montage der Teilefuhrrumierung folgen. Pfeile zeigen die zu klebenden Teile während die weissen Pfeile die ohne Leim zu montierenden Teile anzeigen. Bitte nur Plastikklebstoff verwenden. A - B - C ... Die Buchstaben neben den Nummern zeigen, auf welchem Spritzring der zu montierende Teil zu finden ist. Die mit einem Kreuz markierten Teile sind nicht zu verwenden.

ATENCION - Consejos útiles

Estudiar las instrucciones cuidadosamente antes de comenzar el montaje. Separar las piezas de las bandejitas con un cuchillo afilado o un par de tijeras, y retirar el exceso de plástico o rebade. No arrancar las piezas. Montar las piezas en orden numérico. Utilizar SOLAMENTE pegamento para plástico y en una cantidad pequeña para evitar que se deje el modelo. Las flechas negras indican las piezas que se deben pegar juntas. Las flechas blancas indican las piezas que deben ensamblarse SIN usar pegamento. A - B - C.... Las letras indican en qué bandeja se encuentran las piezas. Pintar las piezas pequeñas antes de separarlas de la bandeja. Retirar la pintura de los lugares por donde se deban pegar las piezas.

HUOMIO - Käytäntöön liittävä neuvoja

Tutti kokonaispo-ohjelma terkkien ennenkuin aloitat. Irrota osat askartelu-veltsellä tai sekäks ja poista ylimääräiset jäljet esim. hiekkaperäillä. Alla kosaan irroita osa väntämällä. Kokos osat numero järjestyksessä. Käytä vain muovillimia ja lästäävätseisesti hyvän työjäljen sikaansamaiseksi. Mustat nuolet taas saumojen liimaustaa. Valkoiset nuolet taas ettei liimaa käytetä. A - B - C Nämä kirjaimet osoittevat millä levyllä osat ovat. Ristiillä merkitytä osa ei käytetä. Pienet osat kannattaa osoittevat ennen irrottamista. Muista poistaa maali tai kromaus liimauskohdista.

ATTENTION - Conseils utiles!

Avoir de connaître le montage, étudier attentivement le dessin. Détacher avec beaucoup soin les morceaux des moules en usant un massicot ou bien un paix de ciseaux et couper avec une petite lame ou avec du papier de vitre fin ébarbages éventuels. Jamais détacher les morceaux avec les mains. Monter les en suivant l'ordre de la numérotation des tables. Eliminer de la moule le numéro de la pièce qui vient d'être montée, en le biffant avec une croix. Les flèches noires indiquent les pièces à coller, les flèches blanches indiquent les pièces à monter sans colle. Employer seulement de la colle pour polystyrene. A - B - C Les lettres aux côtés des numéros indiquent la moule où se trouve la pièces à monter. Les pièces marquées par une croix ne sont pas à utiliser.

ACHTUNG - Conseils utiles!

Avoid de commettre le montage, étudier attentivement le dessin. Détailler avec beaucoup soin les morceaux des moules en usant un massicot ou bien un paix de ciseaux et couper avec une petite lame ou avec du papier de vitre fin ébarbages éventuels. Jamais détacher les morceaux avec les mains. Monter les en suivant l'ordre de la numérotation des tables. Eliminer de la moule le numéro de la pièce qui vient d'être montée, en le biffant avec une croix. Les flèches noires indiquent les pièces à coller, les flèches blanches indiquent les pièces à monter sans colle. Employer seulement de la colle pour polystyrene. A - B - C Les lettres aux côtés des numéros indiquent la moule où se trouve la pièces à monter. Les pièces marquées par une croix ne sont pas à utiliser.

OBBS! Några goda råd

Innan man börjar bygga modellen ska man nog studera ritningeb samt nog kontrollera att alla delarna finns med. Alla smärdar ska mötas medan de sitter kvar i sin ram. Bryt aldrig av en del från ramen, skräp alltid försiktigt med en hobbykniv. Ev. grader avlägsnas enkelt med samma kniv. Vid hotplättningar göljer nummeranvisningen. Stryk efterhand numret på ritningen under monteringen. Svart pilen visar att delen ska limmas, vita pilen att delen kan monteras utan lim. Använd endast lim avsett för polystyrene. A - B - C Bakstötverna visa på vilken ram man finner delen. Överkorsade delar ska ej användas.

OPGELET - Belangrijke bemerkingen!

Bestudeer zorgvuldig het montagewerk voor het bouwen. Breek nooit onderdelen van het kader. Maak ze los met een scherp mes of kleine nagelstiel. Verwijder daarna al het overtochtige plastic en pas de delen afvoeren te lijmen. Gebruik alleen lijm voor plastic modellen. Werk zorgvuldig en spaarszaam, teveel lijm zal uw model beschadigen. Zwarte pijlen duiden de te lijmen delen aan. Witte pijlen verwijzen naar bewegende delen welke niet mogen worden gelijmd. A - B - C Deze letters geven de kaders aan waar de onderdelen zich bevinden. Schilder de kleine onderdelen voor van het kader te snijden. Verwijder de verf van de te lijmen oppervlakken.

Opel Blitz

 The Opel Blitz medium truck was used extensively by the German Army on all fronts during World War Two. Several thousand of them were produced.

They were also used as platforms for anti-aircraft weaponry and tanker, workshop and ambulance versions were made. Of sturdy construction and easy to maintain, it also featured good off-road performance which made it invaluable in both the Russian and African campaigns.

  Il camion medio Opel Blitz venne ampiamente utilizzato dall'Esercito Tedesco su tutti i fronti della 2° Guerra Mondiale. Realizzato in diverse migliaia di esemplari, venne inoltre usato quale piattaforma per armi antiaeree oltreché in versioni: cisterna, officina, ambulanza. Di robusta costruzione e facile manutenzione disponeva di buone caratteristiche fuoristrada che gli consentivano di operare sia nelle lande russe che nei deserti africani.

Typ 82 Kubelwagen

 Typ 82 Kubelwagen is one of the most famous military cars of the Second World War. It was designed by the engineer Ferdinand Porsche and produced by the German manufacturer Volkswagen. The project was born to have a simple vehicle, easy to build and easy to maintain and repair. The overall vehicle design is without bends and the bodywork plates are flat. Great simplicity even in the layout of the frame : just a central tube and the back support for the engine and the gearbox. The Kubelwagen, thanks to its petrol engine with a displacement of 998 cm³, was able to reach the max speed of 80 Km/h. The vehicle did not have 4x4 traction but it was extremely reliable on all types of terrain and it was present on all fronts, often in very tough environmental conditions, where the German Army fought during the entire World War II.

 La Typ 82 Kubelwagen è tra le automobile militari più celebri e diffuse della seconda Guerra mondiale. Venne progettata dall'ingegner Ferdinand Porsche e prodotta dalla Volkswagen. Il progetto nasceva per costruire un veicolo semplice, facile da costruire e facile da manutenere e riparare. Le lamiere erano piatte e il design senza curvature. Anche il telaio era di semplice costruzione con un tubo centrale ed il supporto per il motore posteriore ed il cambio. La Kubelwagen adottava una motore a benzina da 998 Cm³ e raggiungeva la velocità massima di 80 Km/h. Il veicolo non aveva una trazione 4x4 ma si dimostrò, grazie alla validità del progetto, estremamente affidabile su tutti i tipi di terreni ed accompagnò le campagne dell'esercito tedesco su tutti i fronti ed in ogni condizione ambientale.

Istruzioni per l'applicazione delle decalcomanie. Tagliate le decalcomanie con dei fatti, immergete in un bacino d'acqua pulita per circa 20'; mettete in posizione sul modello e farle scivolare dalla carta; per una migliore aderenza comprimere con una pezzuola pulita.

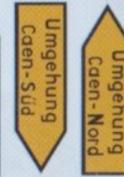

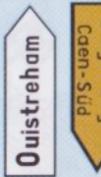

Direction for applying the decals: cut the required decals out of the sheet; dip the into a glass of clean water for about 20'; position the decals on the kit, letting them slide from the paper. For a better adhesion, press them by means of a clean rag.

Pätschung der Aufkleber: Schneidet die benötigten Aufkleber aus dem Blatt ab, taucht sie in ein Glas reinen Wassers für etwa 20' ein, legt das Modell legen und dann vom Papier abziehen. Um eine bessere Haftung zu erreichen, die Abziehbilder mit einem reinen Tuch andrücken.

Anweisungen für Abziehbild-Aufklebung: Die benötigten Abziehbilder von Bartsch abziehen und in ein Glas reinen Wassers für etwa 20' ein tauchen, auf das Modell legen und dann vom Papier abziehen. Um eine bessere Haftung zu erreichen, die Abziehbilder mit einem reinen Tuch andrücken.

Instrucciones para la aplicación de las calcomanías: cortar las calcomanías y las planchar en agua limpia durante 20'; colocar las calcomanías sobre el modelo, haciéndolas deslizarse sobre el papel. Para una mejor adherencia, prensionarlas con un trapo limpio.

Инструкции по применению декалей: Срежьте излишние части декалей от листа, покоптите их в 20' минутах чистой воде, затем, изобразив необходимые места на модели, переведите с бумаги, сдавив их пальцами. Для лучшей проклейки промажьте модель чистой тряпкой.
