 Xtracolor X130

Special thanks to James Keating and Duane Kaiser for all the great pics and reference information.

Thanks to Tsgt Steve Pedrazzi as well as Lt.Col Ron Dorn of the 82nd ATS for all their help.

QF-4G Modifications

BAE Marconi in Mojave, CA is the government contractor that performs all of the modifications to these A/C. These mods are quite extensive when you realize what's going on "under the skin" of the aircraft. On the exterior though, there are only a few minor differences between a line aircraft and a drone A/C.

Most of them are antenna related. These extra antennas are added for telemetry and remote pilot operation and are very easy to add to your kit. Very minor scratchbuilding skills are needed and all the mods' can be added on with minimal effort using some sheet and rod styrene plastic.

Twobobs' goal is to provide you with the most thoroughly researched decals that money can buy. We go beyond using traditional reference resources and many times speak with the actual aircrews and maintainers of our subject matter. Being modelers ourselves, we understand that there is no substitute for this painstaking research and we are proud to offer, what we feel, are the best decals on the market. If you have any subject matter that you feel should be the next Twobobs creation, let us know. We'll be happy to listen to any and all customer input.
