Serving with 5/JG11, Lt. Heinz Knoke, who finished the war with as many as 52 kills, pioneered the practice of air-to-air bombing of Allied aircraft. Depicted in April, 1943, his Bf109G-1 wears RLM74 Dunkelgrau, RLM 75 Grauviolet and softly sprayed RLM75/74 side mottling over RLM76 Lichtgrau. Note the RLM04 Gelb cowl chin and RLM70 Schwarzgrün prop. While it is not definitely established that the unit insignia was carried on this machine's starboard side, a handed version (decal 11) is provided.

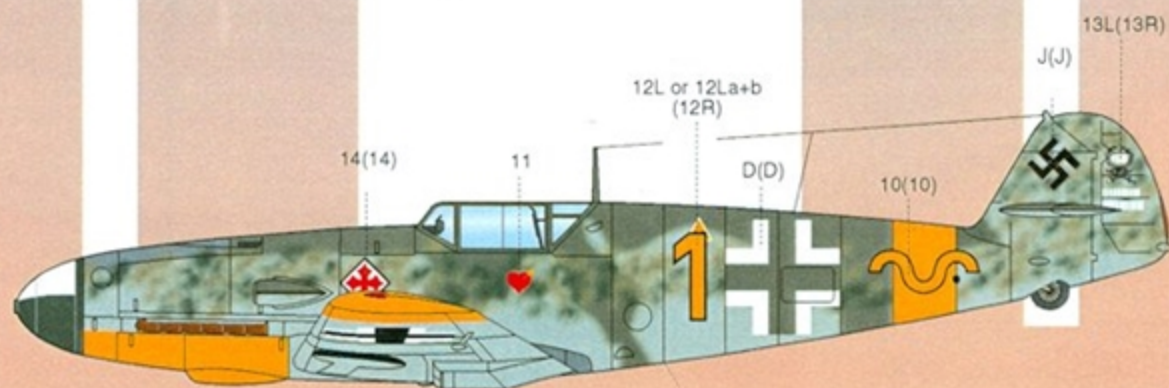

This Bf109G-10 participated in the last, desperate attempts to defend Austria in April, 1945. It wears the late-war fighter scheme of RLM81 Braunviolet and RLM 82 Dunkelgrün over RLM76 Lichtgrau — with heavy mottling of the principal top colors. Note the RLM04 Gelb cowl band and rudder — as well as the RLM70 & white prop spinner.

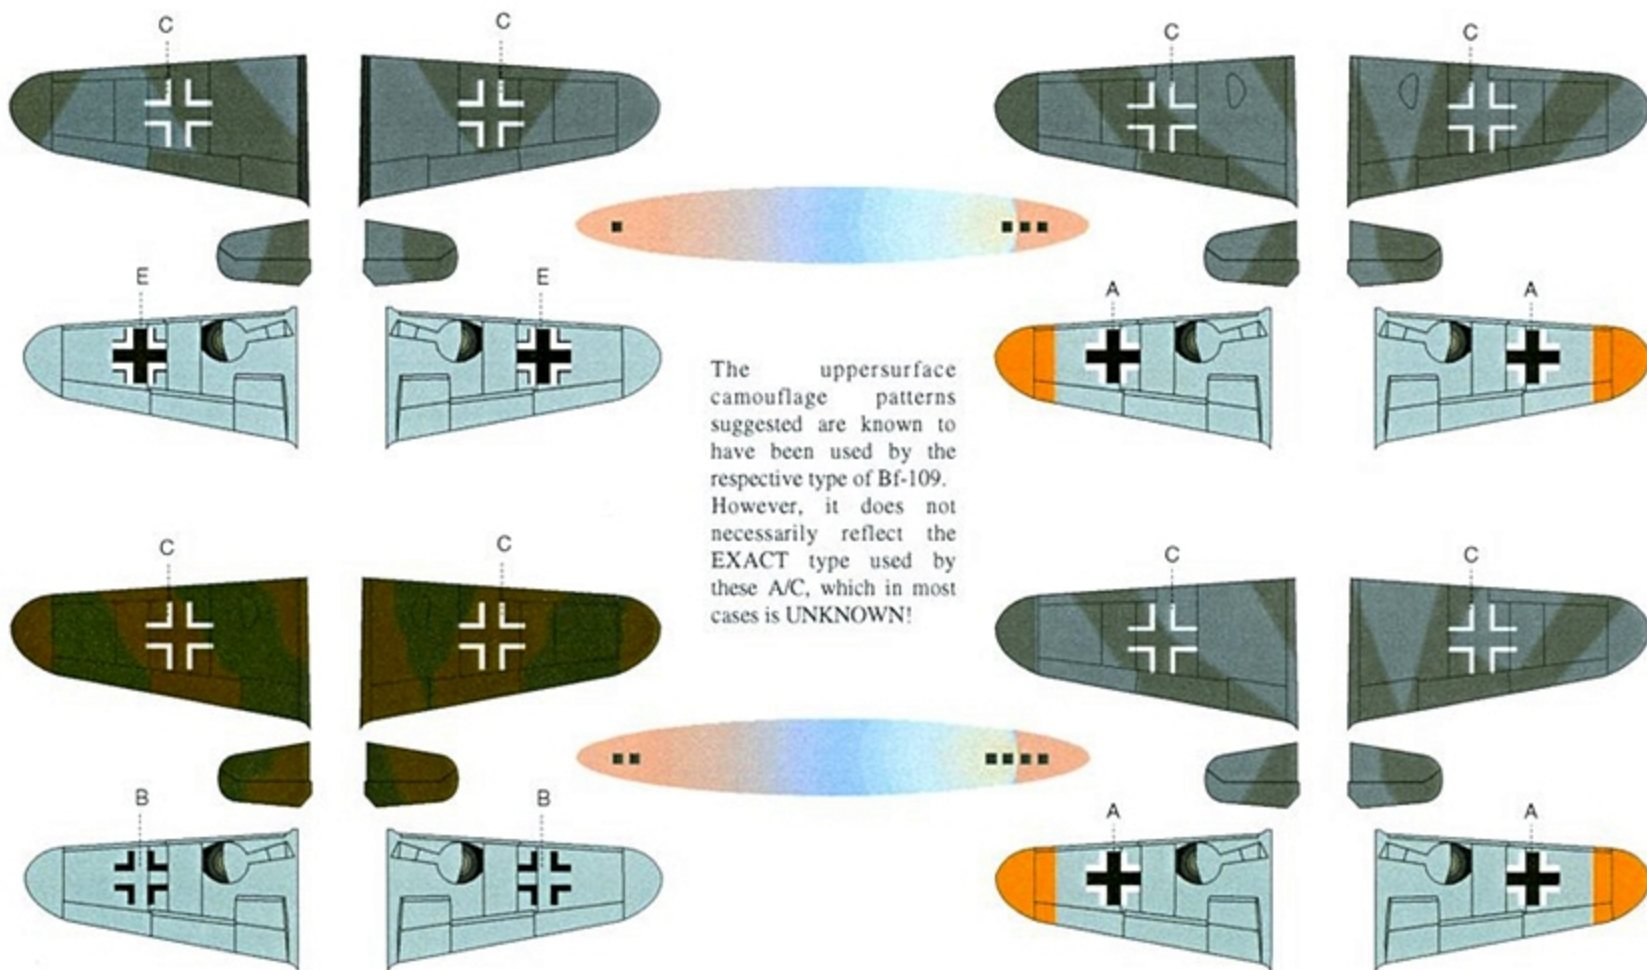

A/C 3: Bf 109G6 Flown by Walter Wolfrum (score 137) of 5/JG52, 1944 Russia. Very standard camouflage of 74/75/76. Yellow fuselage band, lower wing tip and lower cowl. (Notice Yellow does not reach the spinner). Short antennae mast.

A/C 4: Me 109G-2 Flown by Obst Hermann Graf Sta. Kap 9/JG52 Russia, Summer/Fall 1942. Standard 74/75/76 camouflage with very heavy splotching on fuselage above and behind the wings. Fuselage sta. 7 painted fresh RLM 74, concealing battle damage or previous wide fuselage band. Yellow lower wing tips and fuselage band, spinner is 1/2 White with RLM 70. Back plate is also RLM 70. Right side unknown. Although our references do not depict the 9/JG52 badge or the Karaya Hart, it is possible that at one time this A/C carried them, therefore they are supplied and shown on the placement profile.

AeroMaster Decals™

The uppersurface camouflage patterns suggested are known to have been used by the respective type of Bf-109. However, it does not necessarily reflect the EXACT type used by these A/C, which in most cases is UNKNOWN!

Most of these A/C were touched up or painted in the field, almost always obliterating the factory service markings, better known as stencils. We will not "guess" at what was left on each A/C. Instead, we provide you two complete stencil sets.

Happy Modeling!

In the past, we have matched the fuselage crosses to our RLM Warbird shades. However, we understand some of you may not use these colors because of unavailability in your area. From now on, we will supply you with cross stencils to match the crosses with your paints. Simply cut the cross along the dotted line, and after your basic camouflage colors are applied to the model, tape this stencil to the cross position and lightly spray the corresponding color (mostly RLM 74/75/81/82/83). Remove and apply white cross decal and other markings.
