This sheet provides markings for many of the national insignia combinations applied to the Messerschmitt Bf-109 G through K series aircraft. The period covered is from early 1943 through the end of the war. Due to the numerous differences in the "standard" markings applied to Bf-109s coming from the different production facilities, some mixing and matching of specific items may be necessary for your particular subject. Be sure to document your subject with photos for complete authenticity. Applications are as follows:

A: Bf-109G

B, C: Bf-109G & K

For those aircraft which had the center of the fuselage and/or upper wing cross filled in with the local camouflage color, we have provided templates on the reverse side.

**NOTE:** In order to allow perfect registration of colors, the Halkenkreuz have been printed with the black and white portions separate. Apply the white portion first, allow to dry, then apply the black. Also, two sets of solid black Halkenkreuz are provided for the few late war Bf-109s which carried them.
