

SPITFIRE Mk. IXc/Ixe

Na počátku roku 1942 byla převaha nového německého letounu Focke Wulf Fw 190A nad Spitfy verze Mk. V naprostě zřetelná. RAF požadovalo urychlené zavedení výroby Spitfiru s novým výkonnějším motorem Merlin 61. Konstrukční práce na verzích Mk. VII a VIII byly v plném proudu, ale jejich dokončení vyžadovalo ještě nejméně rok a potéba rovnocenného soupeře pro Fw 190 tolík času nedávala. Ministerstvo letectví tedy rozhodlo konvertovat draky verze Spitfire Mk. VC a montovat do nich nové výkonnější motory Merlin. První Spitfy IX byly tedy takto konvertovány a postrádaly mnohá vylepšení, postupně zaváděná do výroby. Ačkoliv nová verze Mark IX neměla aerodynamická zjednodušení nebo upravené řídící plochy plánované pro verze VII a VIII, ukázala se být obávanému Fw 190 více než rovnocennou. Verze Mk. IX se stala mezi Spitfy nejpočetnější a byla páteří stíhacích perutí RAF až do konce války.

In the early months of 1942, with the clear superiority of the Focke Wulf Fw 190 over the Spitfire VB, there was much pressure to get Spitfires into production using the new two-stage supercharged Merlin 61 engine. Although design work on the Mk VII and VIII series was under way, these would take over a year to get into production and a counter to the Fw 190 was urgently needed. The Air Ministry made the decision that Mk VC airframes should be converted to take the more powerful engine and, as a result, many of the early IXs were converted Mk VCs which did not have any of the refinements which later appeared.

Although the Mk IX's airframe did not have the aerodynamic and strength improvements, or the modified control surfaces of the Mk VII and VIII, the Mk IX still proved to be an effective counter to the Focke Wulf Fw 190.

The Mark IX became the most numerous Spitfire version and was the backbone of the RAF fighter squadrons until the end of war.

TECHNICKÁ DATA: / TECHNICAL DATA:

Délka/Lengt:	11,23m
Rozpětí/Wing span:	9,54m
Výška/Height:	3,84m
Nosná plocha/Wing area:	22,48m ²
Hmotnost prázdná/Empty weight:	2 630kg
Vzletová hmotnost/Take-off weight:	3 450kg
Motor/Powplant:	Rolls Royce Merlin 66
Max. rychlosť/Max. speed:	662km/h
Domet/Range:	1 580km
Dostup/Service ceiling:	12 900m
Výzbroj/Armament:	Spitfire Mk.IXC: 2 x 20mm Hispano, 4 x 7,7mm Browning Spitfire Mk.IXE: 2 x 20mm Hispano, 2 x 12,7mm Browning

Realizační tým KP velmi díkuje za velkou pomoc a asistenci při přípravě tohoto modelu všem, kteří poskytli materiály ze svých osobních sbírek.

The KP realization team gratefully acknowledges the co-operation of all who provided materials from their personal collections and thus enabled the preparation of this model.

Před začleněním stavby do výrobního řetězce. Používejte pouze vhodné nástroje, lepidlo a barvy. Během práce nejezte o rejdí. POZOR - obsahuje malé součásti, které mohou mít ostré hrany. Není vhodné pro děti.

Read carefully the instruction leaflet before assembly. Use proper tools, glue and paints. Do not eat and drink during the work. WARNING - contains small parts with possible sharp edges. Not suitable for children.
