THE AVIATION WORKSHOP

Spitfire Mk.Vc EE602 DV-V 'CENTRAL RAILWAYS URUGUAYAN STAFF', 129 (Province of Mysore) Squadron, Ibsley, May 1943. Another 'sponsored' aircraft, EE602 reflects the strange partnership of donations from Uruguay and the Squadron being named after an Indian Province. Note the partial over-painting of the serial number.

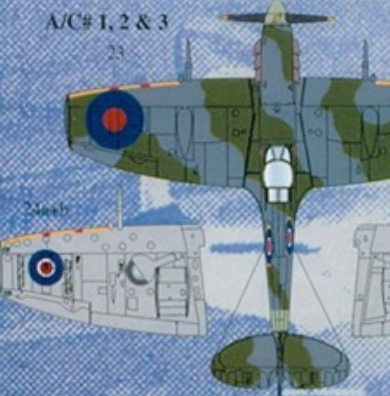

Spitfire Mk.Vc AR491 NN-D. 310 (Czech) Squadron, Exeter, August 1943. This squadron took part in many of the bomber escort operations ('Ramrods') over France during 1942-43. Manned predominantly by Czech volunteers, AR491 proudly wears the Czech emblem on both sides of the fuselage.

Spitfire Mk.Vb BL767 WN-Z 'Anna', 527 (Radar Calibration) Squadron, Digby, early 1945. One of the 'non-combatant' squadrons which provided valuable service in maintaining the quality of Fighter Command's early warning systems. Note the well-aft positioning of the serial number on this aircraft.

Spitfire Mk.Vb BM344 KH-P 'Phyl Marie' Squadron Leader Syd Ford. 403 (Canadian) Squadron, Manston, August 1942. BM344 provided air cover to the ill-fated Dieppe raid (Operation Jubilee) on 19 August 1942. Note the 'personal' name given to the aircraft below the port exhaust manifold.
