Cutting Edge Navy F-5E Update

Special thanks to Fred Krause and John Ferris for all their help with the reference gathering on these A/C. Thanks fellas!!

Many of the F-5Es of VFC-13 are old USAF Aggressor birds. The following "mods" apply to the A/C on this sheet.

Thanks to Fred Krause for this info!

"01" - Old USAF bird but with duckbill nose and LEX mode. This A/C also retains the tall top antenna and does have a radar.

"04" - Standard USAF bird. A/C does have a radar and tall top antenna, USAF round style radome.

"05" - Standard USAF bird with USAF style round radome no LEXs. Radar installed and tall top antenna.

Three very challenging schemes from VFC-13.
NAS Fallon is in the process of completely changing
all their paint schemes to these splinter patterns.

The A/C of VFC-13 are based at Fallon NAS
which is located in Reno, Nevada.

VFC-13 is one of the only true aggressor squadrons left in the US Navy. The pilots of The Fighting Saints are comprised of both active duty and part time reserve pilots.

Twobobs' goal is to provide you with the most thoroughly researched decals that money can buy. We go beyond using traditional reference resources and many times speak with the actual crews and maintainers of our subject matter.

Being modellers ourselves, we understand that there is no substitute for this painstaking research and we are proud to offer, what we feel, are the best decals on the market. If you have any subject matter that you feel should be the next Twobobs creation, let us know. We'll be happy to listen to any and all customer input.
