COLORFUL TOMCAT

F-14A Tomcat BuNo. 160379. From VF-41 as own by CDR Jud Springer, Commander Carrier Air Wing Eight aboard USS Nimitz (CVN-68) January-July 1978. Standard USN scheme of Non-Specular Gull Gray FS36440 upper surfaces with Gloss White FS17875 undersurfaces, landing gear, and control surfaces. F-14 wing and tail surface leading edges were painted in aluminum corrugard finish. Flat Black FS37038 radome and antiglare panel.

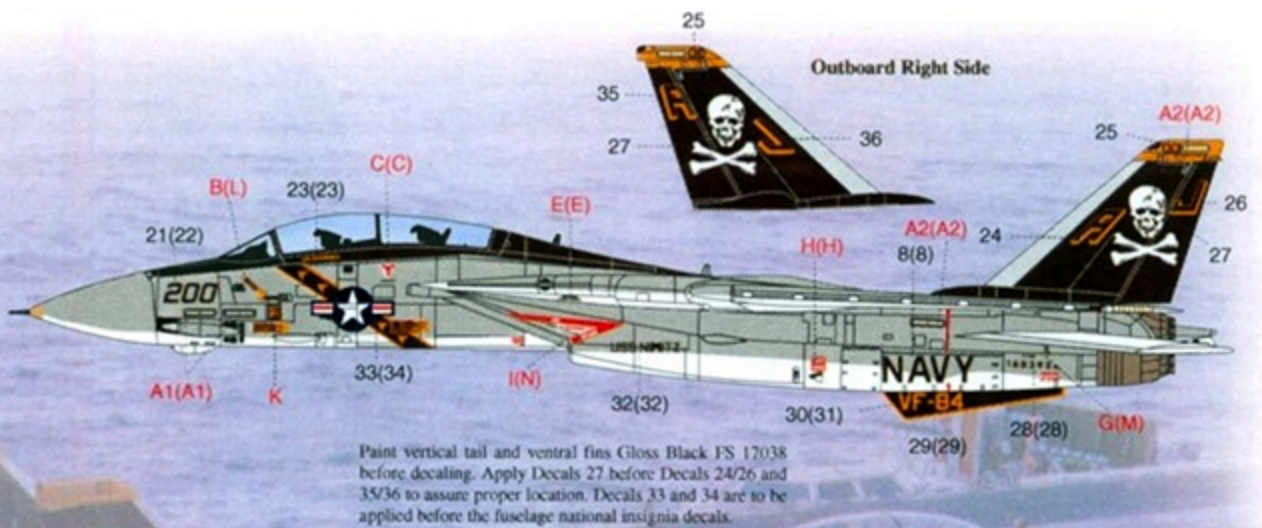

Paint vertical tail Gloss White FS17875 and then apply Decals 5, 5a, 5b and 10, 10a, 10b in numerical order.

F-14A Tomcat BuNo. 160395. VF-41 Black Aces aboard the Nimitz for the 1977/78 Med cruise. Standard USN scheme. Note the variations in the lettering styles on the tail marking and the number styles between this and the CAG bird above. Note also the last two of the modex carried on the inboard fin faces. The aircrew names for AJ114 were blurred in our photos but looked like LT Buck Absner, pilot, and LT Zeke Bradley, RIO.

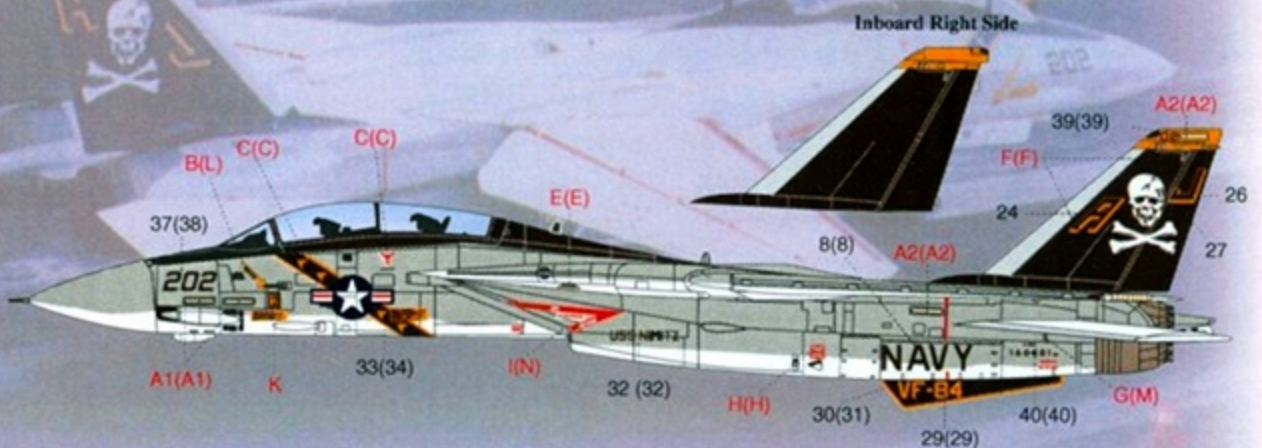

F-14A Tomcat BuNo. 160393. From VF-84 as own by CDR Jud Springer, CAG CVW-8, January-July 1978. Standard USN scheme. Flat Black FS37138 antiglare panel. Tip of radome was Radome Tan. Canopy, vertical fins, and ventral fins were painted Gloss Black FS17038. Fin caps were Gloss Orange Yellow FS13538. The name of the RIO on AJ200 is not known.

Paint vertical tail and ventral fins Gloss Black FS 17038 before decaling. Apply Decals 27 before Decals 24/26 and 35/36 to assure proper location. Decals 33 and 34 are to be applied before the fuselage national insignia decals.

F-14A Tomcat BuNo. 160401. From VF-84 Jolly Rogers aboard USS Nimitz, 1977/78 cruise. Finished as AJ200 in standard USN scheme. Note the Tomcats in CVW-8 were all from Production Block 95. AJ202 was flown by VF-84's Executive Officer. Unfortunately we couldn't read his or his RIO's name.

F-14A Tomcat stencils available in AMD 148-023
