

BLAST-OFF 'F/A-18A ON CARRIER DECK'

VFA-151“ファイティングビジランティーズ”所属のF/A-18Aホーネットがブロストディフレクター前方でU.S.S.ミッドウェーから発艦しようとしている。駐機エリアよりトラクターで牽引されたホーネットは艦首カタパルトに誘導された。クルーや機材が発進時のジェット噴射から守られる様、ブロストディフレクターガーが起こされる。準備完了と同時にカタパルトオフィサーは跪き、艦首方向を指してゴーサインを送る。カタパルト管制官はカタパルトを作動し、ホーネットは轟音を残し発艦する。

Ein F/A-18A Hornet von der Einheit VFA-151 "Fighting Vigilantes" startet vom Deck der U.S.S. Midway, wobei ein Schubdeflektor hinter dem Flugzeug steht.

Vor dem Start wird die Hornet von einem gelben Deckstraktor zum Start-plotz gebracht, der aus einem speziellen Katapult besteht.

Die Schubdeflektoren werden beim Start von Düsenjägern auf Flugzeugträgern errichtet, um das Bodenpersonal vor Hitze zu schützen.

Nach Abschluß der Startvorbereitungen gibt der Deck-Kommandant das Startsignal. Mittels Katapultstart erhebt sich nun die F-18 in die Luft.

Un F/A-18A Hornet viene lanciato dal ponte dell'U.S.S. Midway con il deflettore di spinta eretto dietro l'aereo, che appartiene all'unità VFA-151 "Fighting Vigilantes".

Un trattore tira l'aereo prima del decollo alla posizione di lancio che è composta da un catapulto speciale.

I deflettori di spinta servono per proteggere il personale sul ponte dal calore e dalla spinta. Avendo finito la preparazione, il comandante di ponte dà il comando di decollo. Mediante la spinta del catapulto, l'Hornet si alza in aria.

Avec l'écran pare-flammes dressé derrière lui, un F/A-18A Hornet de la VFA-151 "Fighting Vigilantes" est prêt à décoller du U.S.S. Midway.

Avant le lancement, un tracteur "mule" jaune remorque le Hornet à l'extérieur de son hangar. Le Hornet roule vers la catapulte et est guidé sur la ligne de décollage.

L'écran pare-flammes est ensuite dressé pour protéger les équipes du pont d'envol et les machines de l'extrême chaleur et de la force explosive du lancement.

Quand tout est prêt, l'officier chargé de la catapulte s'agenouille et pointe le mécanisme de déclenchement de la catapulte et donne le signal "Go I".

Le tireur presse le bouton qui signale l'ordre de lancement au contrôleur de la catapulte. Le Hornet est alors propulsé dans l'air.

With the jet blast deflector shield raised behind it, a F/A-18A Hornet of VFA-151 'Fighting Vigilantes' is about to blast off from Prior to the launch, the yellow 'mule' tractor tows the Hornet away from its parking area. The Hornet taxis towards the bow catapult, and guided onto the launch rail.

The jet blast deflector is then raised to protect flight deck crews and machines from the heat and blast of the launch. When all is set, the catapult officer kneels down and points towards the bow, he gives the "Go!" signal.

The shooter presses the button which signals the order to fire to the catapult controller. The Hornet is then launched into the air.

機身後方に昇った噴気爆風の偏向導流板、一機のVFA-151「戦闘民團員」のF/A-18A大黃蜂、正要從中途島號上發火起飛。

起飛之前，黃色的“驥子”拖拉機車把大黃蜂由停泊區拖出來，大黃蜂滑行往艦首彈射器，再誘導到彈射軌去。

這時，噴氣爆風偏向導流板升起了，保護甲板地勤人員和機器，免受起飛時的熱力和爆風所傷害。

一切就緒，彈射士官單膝跪下並指向艦首，作出“出發！”的訊號。

彈射員按下按鈕向彈射器傳送發火的命令，大黃蜂迅即騰空而起。

MARKING AND PAINTING

■ Correct Method for Applying Decals

- ① Clean model surface with wet cloth
- ② Cut each design out of decal sheet and dip them in warm water for 20 seconds.
- ③ Check with finger tip if design is loose on base paper. If so, place it on proper position on model and slide off base paper leaving design on model.
- ④ Move design to exact position with wet finger tip, and push out excess water and air bubbles under decal with soft cotton cloth.
- ⑤ When decals get dry, wipe off with wet cloth excess glue left around decals.

CARRIER DECK

- Decal application method
 - ① Apply the decal to the surface where the scratches or dirt are located, and rub it with a cloth.
 - ② Cut the desired decal from the sheet and dip it in warm water for 20 seconds.
 - ③ Check if the decal is loose from the base paper. If so, place it on the correct position on the model and slide it off the base paper leaving the design on the model.
 - ④ Move the decal to its exact position with a wet finger tip, and push out excess water and air bubbles under the decal with a soft cotton cloth.
 - ⑤ When the decal is dry, wipe off the excess glue left around the decal with a wet cloth.

Correct Method for Applying Decals

- ① Clean model surface with wet cloth.
- ② Cut each design out of decal sheet and dip them in warm water for 20 seconds.
- ③ Check with finger tip if design is loose on base paper. If so, place it on proper position on model and slide off base paper leaving design on model.
- ④ Move design to exact position with wet finger tip, and push out excess water and air bubbles under decal with soft cotton cloth.
- ⑤ When decals get dry, wipe off with wet cloth excess glue left around decals.

Das Korrekte Aufbringen der Abziehbilder

- ① Oberfläche des Modells mit feuchtem Tuch reinigen.
- ② Jedes Motiv einzeln aus dem Bogen heraus schneiden und 20 Sekunden in warmes Wasser tauchen.
- ③ Mit dem Finger prüfen, ob sich das Motiv vom Trägerpapier gelöst hat. Wenn ja, so schließen Sie es vom Papier weg an seine genaue Position auf dem Modell.
- ④ Korrigieren Sie die exakte Lage mit nasser Fingerspitze und drücken Sie Wasserblasen unter dem Abziehbild mit einem weichen Baumwolltuch weg.
- ⑤ Entfernen Sie bei An trocknen der Abziehbilder die Klebe mittel ränder mit einem feuchten Tuch.

Comment appliquer les décalcomanies correctement

- ① Nettoyer la surface du modèle avec un chiffon humide.
- ② Découper chaque décalcomanie de sa planche et la plonger dans l'eau tiède pendant vingt secondes.
- ③ Vérifier avec le bout du doigt si le dessin se détache de son papier support. Si oui, le positionner à l'endroit choisi sur le modèle et retirer doucement le papier-support.
- ④ Positionner la décalcomanie correctement avec un doigt humide et éponger tout restant d'eau et toutes bulles d'air sous la décalcomanie avec un chiffon doux.
- ⑤ Lorsque les décalcomanies ont séché, retirer avec un chiffon humide tout excès de colle autour de la décalcomanie.

Modo esatto per applicare le decalcopanie

- ① Pulire la superficie del modello con un panno umido.
- ② Ritagliare ciascun disegno dal foglio decalcopanie e immergervi in acqua calda per 20 secondi.
- ③ Controllare col polpastrello se il disegno è allentato sulla base di carta. In questo caso, applicarlo nella esatta posizione sul modello facendolo scivolare dalla base di carta.
- ④ Spostare il disegno nella esatta posizione mediante il polpastrello umido, quindi togliere l'acqua in eccesso e le bolle d'aria sotto la decalcopanie mediante un panno soffice di cotone.
- ⑤ Quando le decalcopanie sono asciutte, toglierle con un panno umido l'eccesio di colla intorno alla decalcopanie stessa.

■ 貼上水印標貼的正確方法：

- ①用濕布抹乾淨模型表面。
- ②按照各標貼的形狀從標貼紙上切出，浸到溫水之中約20秒。
- ③用指尖試行觸摸以確定標貼是否已脫離底紙，如果屬實，則把標貼連底紙放到模型表面的適當位置上，小心地將底紙移去，把標貼留在模型表面。
- ④以濕水的指尖把標貼移到正確的位置上，再用柔軟的綿質布料把標貼輕壓，以擠出標貼底下的氣泡和水份。
- ⑤標貼乾後，用濕布輕拭標貼及其附近的模型表面，以洗去可能殘留在標貼附近的多餘膠水，確保效果完美。
