Nocturnal Birds of Prey Part 1

BEST SELLERS

Suggested Kit: Monogram Pro Modeler Bf110G

Part I
Nocturnal Birds of Prey

NOTE

While researching these two sheets, we found that there were no regulations outlining the color demarcation for the lower wings on 110G using the 76/22 combination. Some sources indicate only the outboard wing panel and nacelle were Black. Others say the complete bottom wing was Black. We were able to find two photos that clearly show that the complete bottom wing was Black. These are found in Model Art #480, Luftwaffe Night Fighters pages 41 and 159, therefore we suggest this scheme on our two Bf 110G Night Fighter sheets. If you can provide solid information about our conclusion being wrong, we would like to hear from you (via post) to correct future reprints.
