F-15DJ
Nyutabaru AB
Jul 1997

Hiko Kyodo-tai
The Hiko Kyodo-tai is the only F-15 Aggressor squadron in the world. They are stationed at Nyutabaru AB on the southern part of the island of Kyushu in northern Japan.

A DJ Eagle can be easily built by making these simple modifications to the Academy F-15E kit.
• Leave off the CFTs
• Remove the two ALQ-135 antennas on the tail.

A J Eagle can be built by using the various C/J kits that are out there and doing the ALQ-135 and AN/ALQ-128 mods.

Also Japanese Eagles do not have the AN/ALQ-128 TEWS antennas on the tips of the vertical stabs. Both vert stab probes are the same size and are only there for weight balance.

Typical load-out is two dummy Sidewinders with live seeker heads on the outer wing pylons. ACMI pods are typically not carried (there is documentation to show that they do at times) since the JASDF doesn't have access to instrumented ranges like those available here in the United States.

References

References for this jet were taken from the excellent Model Art Book, Tactical Fighter Training Group in Color. This book is part of the on-going Model Art Color Guide Series.

Four-view, full-color profiles are provided in this book of various aircraft from the JASDF Aggressor force from Nyutabaru AB in Japan.

Available at various military book resellers.

Twoobobs' goal is to provide you with the most thoroughly researched decals that money can buy. We go beyond using traditional reference resources and many times speak with the actual aircrews and maintainers of our subject matter. Being modelers ourselves, we understand that there is no substitute for this painstaking research and we are proud to offer, what we feel, are the best decals on the market. If you have any subject matter that you feel should be the next Twoobobs creation, let us know. We'll be happy to listen to any and all customer input.
