JUNKERS Ju86 D1

- No1 Construct kit as per instructions, except leaving off the engines.
- No2 Glue new engine halves together. Sand down backing plate from the new propeller hub and add to cowlings.
- No3 Slide engines over the wing starting from the tips and glue.
NOTE; both inside engine halves are handed so as to bring the cowls parallel with the fuselage.
- No4 Sand propeller tips to a point and glue in position.
- No5 Paint to preference.
- Glues 5 minute epoxy or Super Glue's.

← Remove shaded area

New engine cowling

Align engines between these raised lines on the kit wing.
