*Decal Placement Instructions*

**COCKPIT**  
Black interior, gray instrument panel,  
black seat, green seat cushions,  
red head rest.  
Inside of canopy framing; black.

Note: This is an exhaust port for the more powerful Canadair version of the T-33. Advanced modelers may prefer to create a hole in the kit instead of using the decal.

Intake Decal  
If using this decal, fill recess in kit if it has this detail.

Apply matt clear coat if using anti glare panel and walkway decals.

Use white decal #42 if anti glare decal is not used.

Paint canopy ledge red, then apply decals facing inwards.  
INSIDE BULKHEAD OF CANOPY FRAME  
FIRE HAZARD NO STOWAGE

NOTE: If using the vent decals provided for the intake bleed vents, fill the kit vents prior to painting.

Overall finish is gloss except walkways and anti glare panel in front of windscreen which are both matt black.

**PAINTING DETAILS**  
Inside landing gear doors, air brakes: aluminum paint.  
Wheels, air brakes and flap wells: aluminum paint.  
Landing gear and main wheels; aluminum paint.

EXTRA DECALS FOR LOWERED FLAPS

Cut here for separate parts to drop flaps.

Separate decals for gear doors and air brakes.
