NATO TIGER MEET 2018/ 100TH AF ANNIVERSARY

The basis for the design of the decal was the Kitty Hawk (1/48) and Revell (1/72) models. However, the decals can be applied to the Italeri model, due to the fact that the front landing, tanks and some elements on the top of the wings were designed with an additional material. Before applying, please check the fit of the element to the model, which will avoid unnecessary stress in the course of the application
