**MODELING NOTES**

Pursuant to their duties, the 85th TES and 422nd TES aircraft can be seen with almost any kind of ordnance and equipment. Both squadron's F-16 aircraft have gone through the Common Configuration Implementation Program (CCIP) upgrade. So both the block 42 & 50 aircraft are of the same standard, and have the same capabilities.

The following guide illustrates the current and upcoming ordnance and equipment used by the USAF's F-16 block 40/50 CCIP aircraft.

WING STATIONS

Air-to-Surface Missiles

Laser Guided Bombs

Joint Direct Attack Munitions

## PAINT GUIDE

In 2005 certain block 50 CCIP airframes assigned to Shaw, Eglin and Spangdahlem began to receive a special RAM coating as part of the "Have Glass" modifications to the entire F-16 fleet. The finish is rough, textured and collects dirt and grime easily, giving a worn and weathered appearance. It has a distinct metallic sheen which resembles metal flake paint.
