Note: These A/C feature a hodgepodge of the various modifications that are being implemented on the A-10 aircraft. The following is a brief description of these modifications.

LASTE - Low-Altitude Safety and Targeting Enhancement upgrade provided computerized weapon-aiming equipment, an autopilot, and a ground-collision warning system. These A/C feature NVG compatible formation lights.

EGI - Embedded GPS/INS modification that is on all of these A/C. EGI aircraft can be discriminated by the GPS dome on the A/C directly behind the canopy.

SATCOM - Provides Beyond Line of Sight (BLOS) communication capability. The aircraft can now communicate more effectively with ground forces as well as higher headquarters. This modification interfaces with the new Smart Multi-Function Color Display (SMFCD) as well as the A-10C Precision Engagement mods coming on line.

Twobobs' goal is to provide you with the most thoroughly researched decals that money can buy. We go beyond using traditional reference resources and many times speak with the actual aircrews and maintainers of our subject matter. Being modelers ourselves, we understand that there is no substitute for this painstaking research and we are proud to offer, what we feel, are the best decals on the market. If you have any subject matter that you feel should be the next Twobobs creation, let us know. We'll be happy to listen to any and all customer input.
