

**SuperScale Decal No.48-799  
 Republic F-84F Thunderstreak  
 401st Fighter Bomber Wing  
 Alexandria AFB, 1957**

When applying the nose decal, always use a quality decal setting solution like Micro Set and Micro Sol and a good artist sable brush. Because of the compound curve of the nose, some wrinkling may occur. Use your brush to work the wrinkles to as few as possible. When the decal is dry, slice the wrinkles lengthwise with a sharp hobby knife. Re-wet the decal with the setting solution and lift one edge of the decal and allow it to overlap the other and brush over with setting solution for a smooth finish.
