RAMMJÄGERS Part 2

48-232

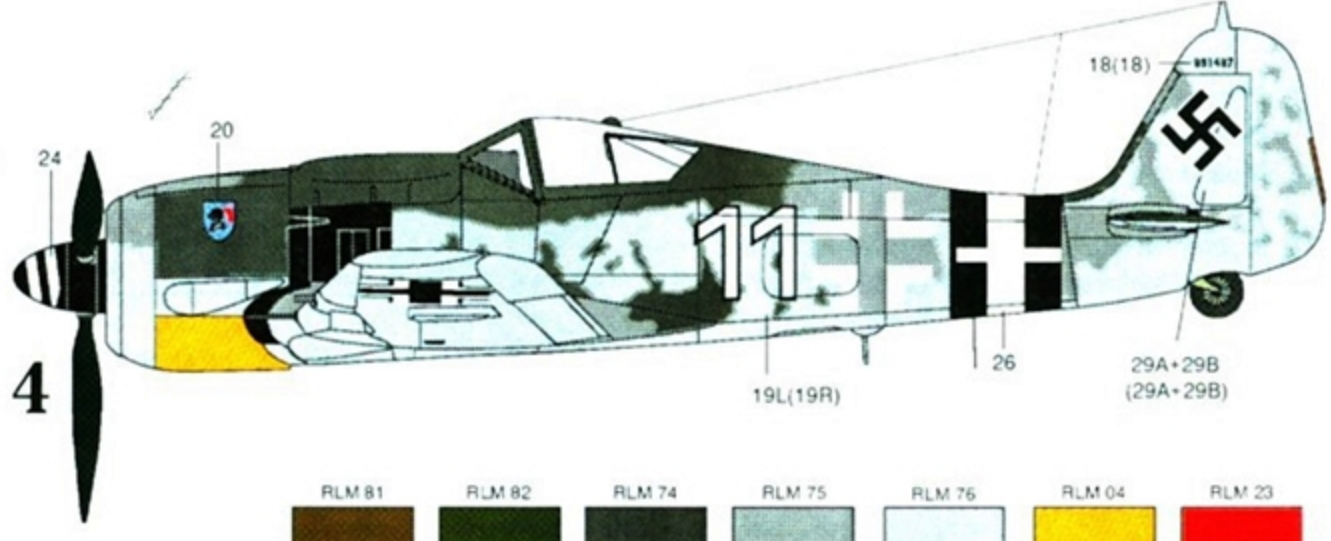

FW 190 A8/R8 of JG3. A/C appears to be camouflaged in RLM 74/75/76, although the whole fuselage is in RLM 74, with a light patch of RLM 76 behind the cross. Upper deck guns were removed to compensate for the extra weight of steel armor plating on the fuselage and the armored glass panels.

FW 190 A8 WK # 172732 of 5/II/JG300. Flown by Unteroffizier Ernst Schröder. "Kolle Olleg" was a German carnival slogan and badge. The right side name, Edelgard, was seen in at least 2 styles (both provided). A/C had no canopy pulleys (on top) nor antenna. Standard RLM 74/75/76 camouflage. Notice heavy patch of RLM 75 possibly covering earlier A/C number.

FW 190 A8 WR # 961076 of 5/JG4. Flown by Obergefreiter Axel Kessler 19 April 1945 to Bulltofta-Sweden while defecting. Probably not his personal A/C. A/C camouflage on 81/82/76 with no fuselage mottling except at the very rear end, possibly trying to cover a former Reich Defense Band. Exhaust panel could have been exhaust stains, and not a deliberate pattern. No traces of armor plating on photos.

FW 190 A8/R8 WK # 641497 of 5/JG4. Flown by Gefr. Walter Wagner. A/C participated in Operation Bodenplatte, was damaged, landed, and then confiscated by the U.S. 404 FG USAAF. A/C was repaired and flown by U.S. personnel. Upper left cowling panel with badge seem to have been cannibalized off another A/C.
