

Luftwaffe Insignia & Numbers, General Fighters

This sheet includes markings of the major Luftwaffe Units operating across Europe and North Africa from 1940 to 1945. As well as unit insignia, wing and fuselage crosses are included along with individual pilot rank markings used generally on Luftwaffe fighters throughout the conflict. Various styles of 'kill' markings are also included. As the scope of this sheet is vast it is suggested that the modeller use their own references to complete the livery of choice, the idea of this set being to allow the modeller the option to complete schemes not generally available or to make up squadron mates to more well known aircraft to complete 'Kette' etc.
