Hptm. “Toni” Hackl’s Bf 109 G-6 flown while he was *Gruppenkommandeur* of III./JG 11.
Unfortunately in this photo, he is standing in front of the tail, blocking the view of the victory markings. Luckily there is a good photo of the rudder of his Fw 190 that shared the same design.

The tall antenna mast and missing DF loop are evident. The bright sun has lightened the Yellow band between the two men making it appear almost White.

Messerschmitt Bf 109 G-6s

Manufactured in greater numbers than any other Messerschmitt 109 variant, the G-6 has always been very popular with the modelers considered to be the classic Bf 109 by many. Luftwaffe pilots complained the *Beule* or bumps covering the breaches of the MG 131 13 mm machine guns reduced speed, nevertheless, they contribute to the distinctive personality of the Bf 109. Also the bigger guns were heavier affecting performance.

For accurate color reference we recommend the Luftwaffe Color Chart published by Eagle Editions Ltd. featuring paint chips prepared by Warnecke and Böhm available from your local hobby shop or Eagle Editions Ltd.
