# Tornado

White Tiger Tornado, it's from the 36= Stormo (Wing), 12= Gruppo (Squadron), Giso del Colle base, as seen in the NATO Tiger Meet 2002, Beja, Portugal.

The number 351, on the other side of the rudder, is reminder of a WWII squadron. The origin of the Tiger is from its previous Sqd, the 21st, to which that Tornado ADV originally belonged.

The 21st was stationed in Cameri airport, then was transferred to Giso del Colle in July 1999.

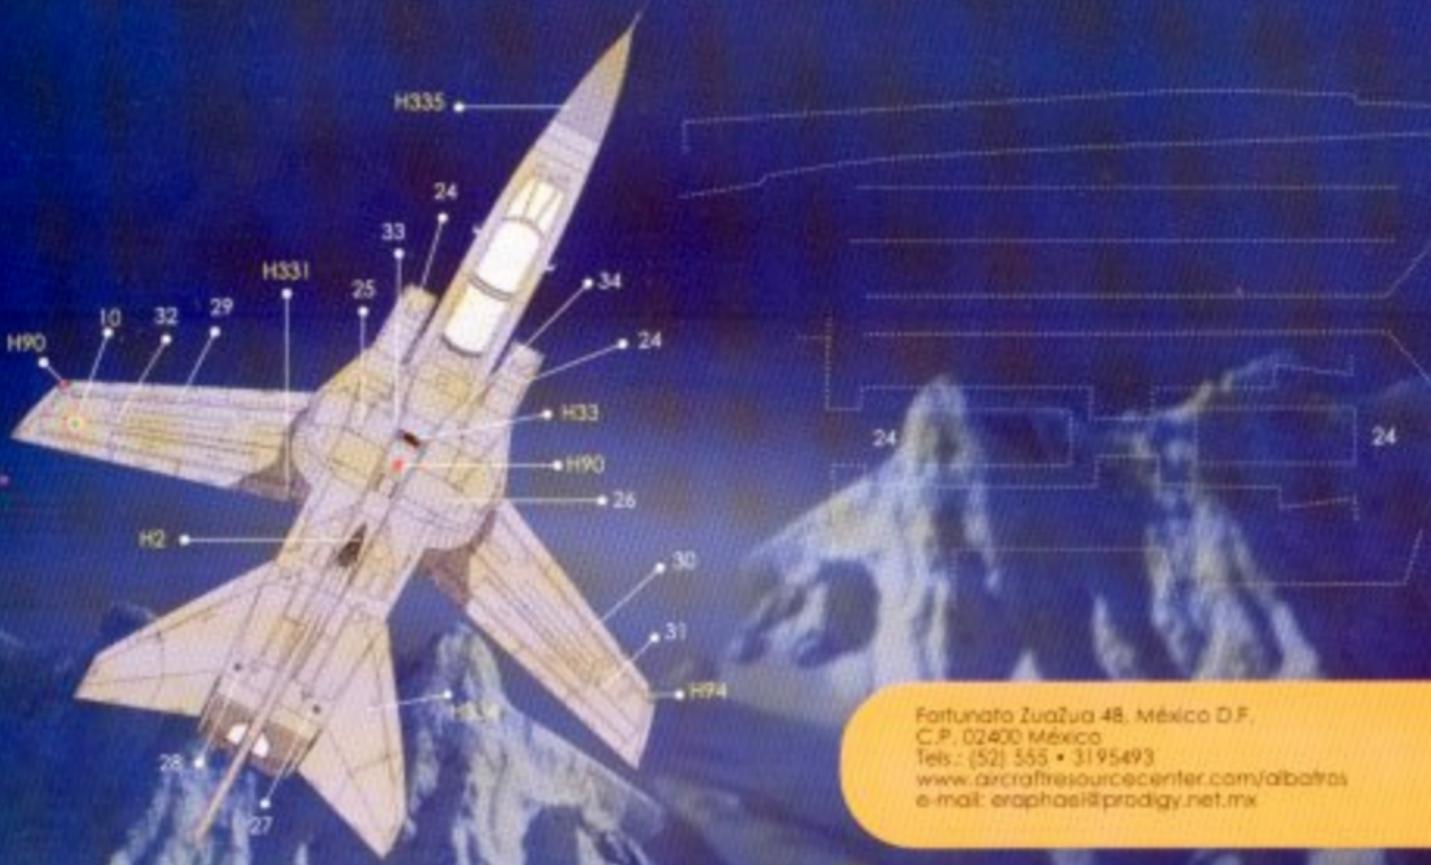

Since March 2002 the 21st Sqd. is in a "stand-by position", all the personnel and airplanes were transferred to the 12= Gruppo C.I (Caccia Intercezioni = Fighter interceptors) already stationed in Giso del Colle.
