9° Gr. 4° St. C.T. (Leverano 1944)
Pil. Serg. Magg. AURELIO LISE

La mimetica degli aerei della AERONAUTICA COBELLIGERANTE non utilizza uno schema fisso ma si limita a mantenere la colorazione tipica della ex REGIA AERONAUTICA per quanto riguarda gli aerei di fabbricazione nazionale ed a mantenere quella originale per quanto riguarda quelli provenienti dall'U.S.A.F. e dalla RAF, esempio gli SPITFIRE o AIRACOBRA. Le insegne nazionali, per quanto riguarda gli aerei di provenienza straniera sono oblitrate con vernici nazionali ed in alcuni casi, vedasi alcuni AIRACOBRA le coccarde sono sovrapposte alle stelle americane formando un'insegna del tutto originale.

The Co-Belligerent A.F. don't standardized a camouflage scheme: the planes maintained their original colours. It is true both for the late Regia Aeronautica planes (mainly in the late war scheme of Dark Green and Light Grey) and for the U.S. and British planes. Only the national insignia were painted-out using Italian paints; in some case (mainly on the P-39) the Italian roundels were over-imposed at the U.S.A.A.F. insignia creating a very original feature.
