New Style Demarcation Line

The colors on most F-16's are as follows:

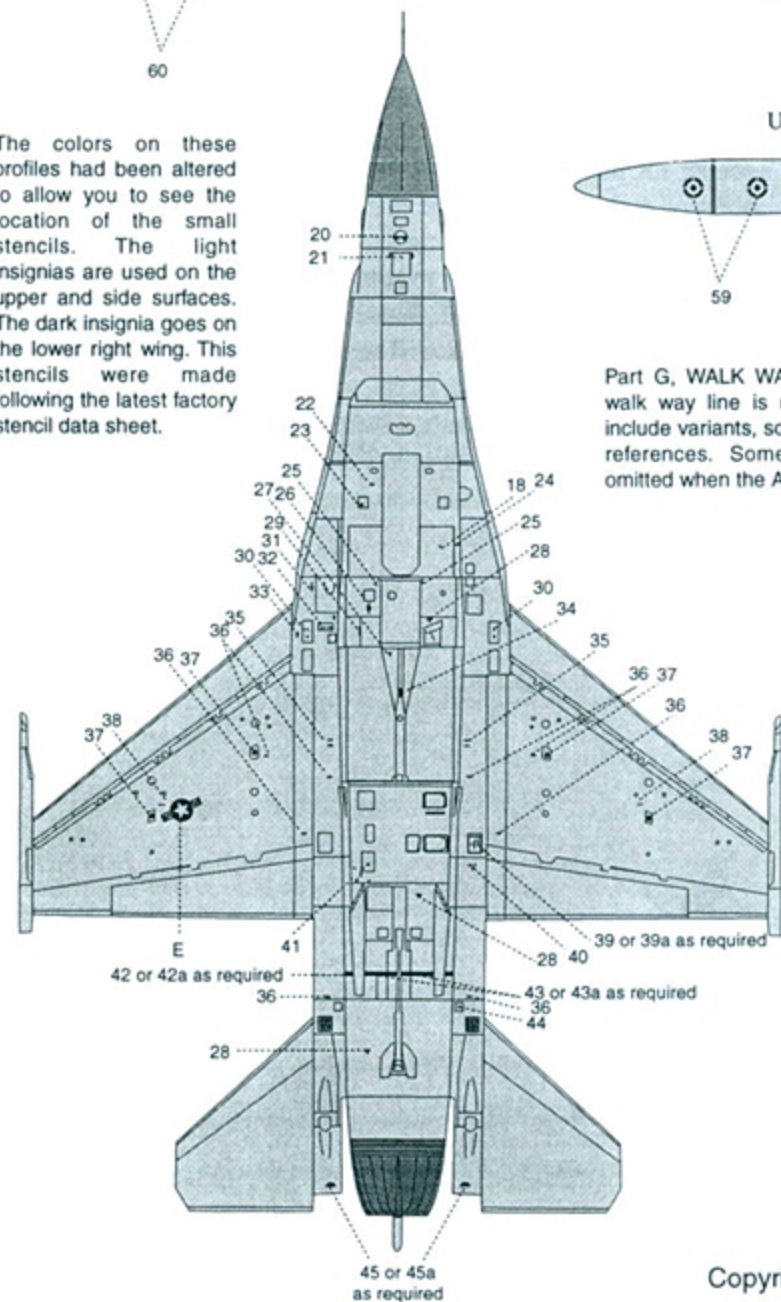

FS 36118 Gunship Gray: 
Upper surfaces except nose section

FS 36320 Dk. Ghost Gray: 
Upper forward fuselage,
ventral & vertical fins, and rudder

FS 36375 Lt. Ghost Gray: 
All lower surfaces and most drop tanks etc.

ANA 43 Neutral Gray: 
Radome

The colors on these profiles had been altered to allow you to see the location of the small stencils. The light insignias are used on the upper and side surfaces. The dark insignia goes on the lower right wing. This stencils were made following the latest factory stencil data sheet.

Part G, WALK WAY/NO STEP is used when walk way line is not present. Some stencils include variants, so please check carefully your references. Sometimes small stencils are omitted when the A/C is repainted.

Take into consideration that all these stencils were not re-applied after the aircraft went through overhands, paint jobs etc. Check your references whenever possible. There are enough stencils for 3 combinations.
