The "Painted on" Look

DIRECTIONS

Follow these simple 4 point directions

1. Remove decal from backing sheet.
2. Cut decal from sheet.
3. Place in position on model, making sure that decal is sitting correctly.
Rub across entire marking with a ball pen to transfer marking from carrier film.
4. Finally, take a clean, soft cloth or tissue and apply pressure to ensure that marking is firmly in position.

NOTE: If decal is damaged in application it can be removed by applying scotch tape over it and peeling off, the damaged decal will adhere to the tape.

These Decals are researched and drawn by Alan Breeze
