| 10. Footstep (2 pcs)                 |                                 |

## General instructions:

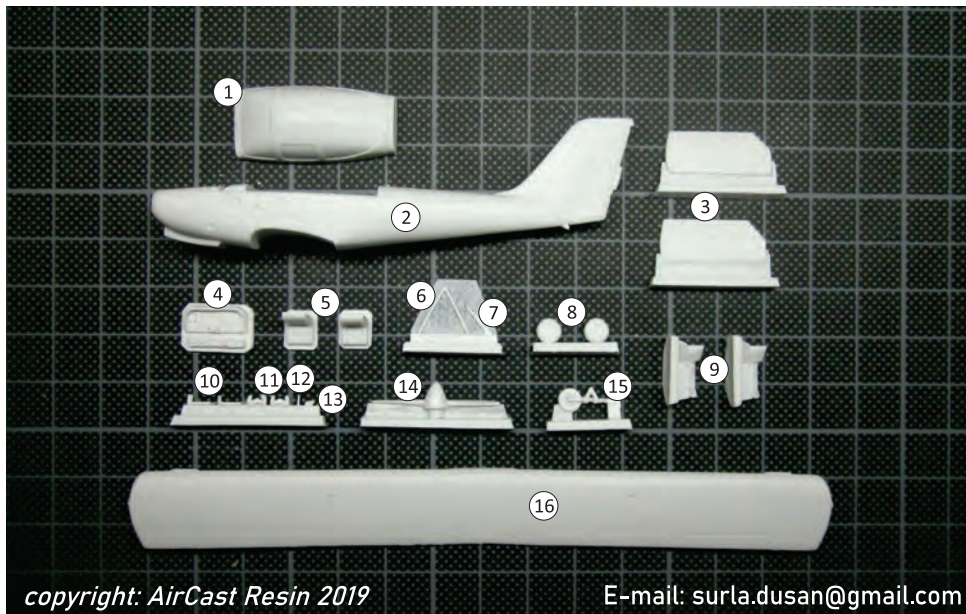

Resin parts should be cleaned of flash, thoroughly cleaned using solvent and washed in detergent.

For attaching resin parts use solely cyano-acrylate glue.

Transparent parts should be glued using epoxy, white or crystal clear glue.

## Notes:

- all gear legs are enforced with wire
- model is already nose-balanced, so there is no need to add weight to avoid tail-sitting.
- small parts (additional antennas, position lights) should be scratchbuilt.

## Decal placement and painting tips

1. Fuselage stripe (left)
2. Fuselage stripe (right)
3. Tail (left)
4. Tail (right)
5. Piper (both sides)

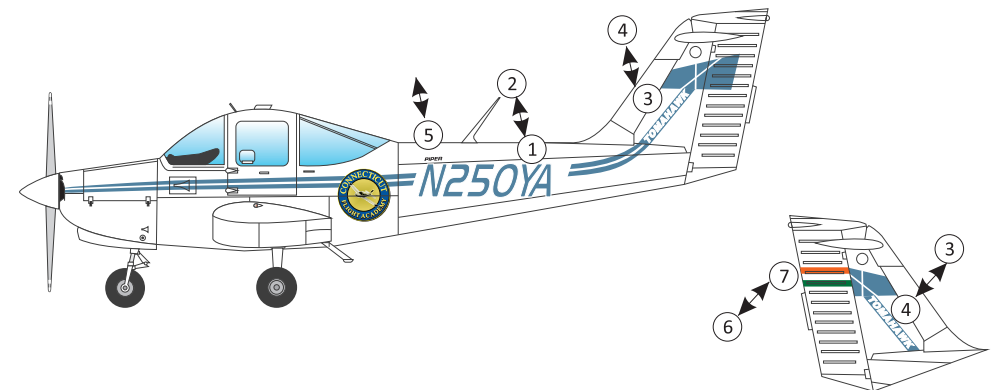

propeller:  
front light gray, with double white tip stripe  
backside painted black

- alternative: in one moment vertical stabiliser was changed  
Trim decals 3 and 4. along the line of vertical stabiliser
6. Flag (left)
  7. Flag (right)

## Notes:

- decals are home-made, so they require a bit of attention when cutting and applying.
- For painting and detailing please use references available on internet

\*drawings are not to scale
