

Two Accurate, Two Colorful Twobobs!

WHAT's OUT THERE? 1/48th Hasegawa A-4M

VMA-211 "Avengers"

VMAT-102 was activated on 1 January 1969 and flew A-4Cs. In 1970, the unit began receiving A-4Es and flew these along with A-4Fs and the TA-4J. 1975 brought the A-4M to the squadron and these were flown along with TA-4Js until the squadron was disestablished in 1987. The squadron was responsible for the training of ground attack pilots in all aspects of the A-4. The squadron also provided technical training for maintenance personnel.

VMA-214 "Blacksheep"

VMA-322 flew the A-4C from 1962 until the early 1970s when these were replaced by the A-4E. The A-4Ms were received in 1984 and the squadron flew this version until its deactivation in 1992.

Twobobs' goal is to provide you with the most thoroughly researched decals that money can buy. We go beyond using traditional reference resources and many times speak with the actual aircrews and maintainers of our subject matter.

Being modelers ourselves, we understand that there is no substitute for this painstaking research and we are proud to offer, what we feel, are the best decals on the market. If you have any subject matter that you feel should be the next Twobobs creation, let us know. We'll be happy to listen to any and all customer input.
