## 09407 U.S.S. LEXINGTON U.S. Navy Aircraft Carrier

LIFE-LIKE PRODUCTS, INC., BALTIMORE, MD. 21211, U.S.A.

## TAKE YOUR TIME and HAVE FUN ASSEMBLING YOUR SHIP

This line of TABLE TOP NAVY Kits are made for a dual role. For the water line collector the hull is separated at the water line. You can set up your own sea battles or add the underwater hull to make shelf models.

### PAINTING INSTRUCTIONS

Use a good plastic cement and enamel or plastic paints.

Add to the realism of your model by painting the following details . . .

Tan — Decks.

Red — Hull below the water line.

Black — Gun barrel, anchors, cranes, masts, propeller shafts.

Gold — Propellers.

For the sake of simplicity — assembly should follow by the numbers (1-2-3-4-etc.). Where possible cement on the inside joints and avoid getting cement on outer surfaces.

### NOW ASSEMBLE YOUR MODEL . . .

1. Hull — Cement left side to right side.
2. Top Hull — Cement left side to right side.
3. Deck — Cement to top hull.
4. Control Island — Cement left side to right side.

Now cement your model together following the numbers on the drawings (5-6-7-8-etc.).
