

ASSEMBLY INSTRUCTIONS

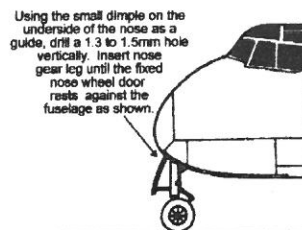

OZMODS' 1/144 DHC-4 CARIBOU

MAIN LANDING GEAR ASSEMBLY DETAILS

NOSE LANDING GEAR ASSEMBLY DETAILS

PUT YOUR HEALTH AND SAFETY FIRST!

● The plastic parts of this kit are moulded in polyurethane. As with any type of plastic, wear a dust mask or other protective breathing device to avoid inhalation of dust particles when sanding.

Where sanding is required, it is strongly advised that wet and dry sandpapers be used - always work with water as this traps the resin dust and minimises inhalation of particles.

Also wash hands and parts thoroughly when you have completed sanding work.

● When using Superglue or Two-Part Epoxy glues, take precautions to avoid skin and eye contact and breathing in the fumes of such glues.

The use of barrier cream on hands or wearing disposable gloves, and working in a well-ventilated area, is strongly recommended.

● Also be cautious when cutting and sawing parts - take special care when using sharp blades to avoid any injury to yourself.

WORKING WITH RESIN

The polyurethane resin used in the manufacture of this kit has similar characteristics to styrene - however, like styrene, it can break if subjected to excessive bending pressures.

Here are a few tips to help make the job easier:

* To remove parts attached to runners, simply cut off with a blade or, where they are joined with a 'gate', score this with a knife and gently snap them off.

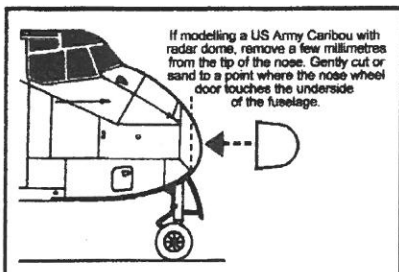

* Remove any flash by gently snapping off with a finger, or cutting with a scalpel.

* Clean up parts (i.e., where 'gate' joiners have left a protrusion) as you would with a styrene part - carefully cut or scrape with a sharp blade.

* Gently sand mating surfaces prior to gluing together (see "Put Your Health and Safety First").

* Use Superglue or Two-Part Epoxy to fix the plastic and photoetched parts (see "Put Your Health and Safety First").

* Before painting, it is recommended that the parts first be washed, dried and coated with a primer before applying the finishing colours.

CLEAR COCKPIT CANOPY

For advanced modellers who wish to detail the cockpit, a vacuumformed transparent canopy (plus spare) is supplied with this kit.

DE HAVILLAND CANADA DHC-4A (C-7) CARIBOU

SPECIFICATIONS

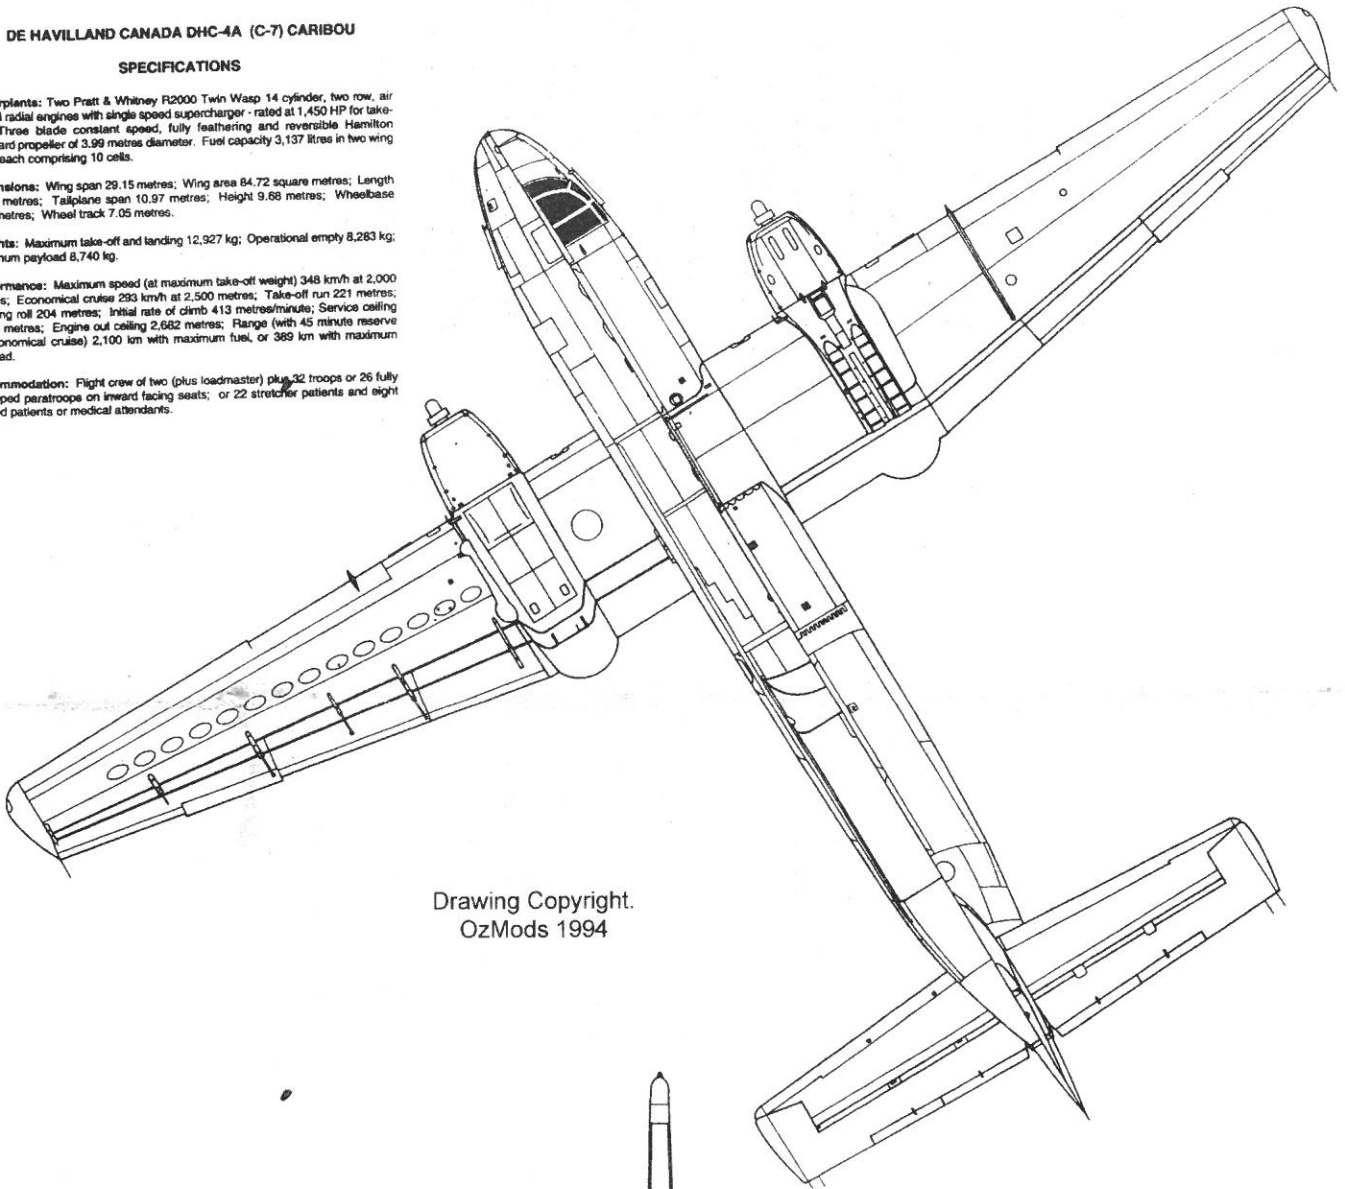

Powerplants: Two Pratt & Whitney R2000 Twin Wasp 14 cylinder, two row, air cooled radial engines with single speed supercharger - rated at 1,450 HP for take-off. Three blade constant speed, fully feathering and reversible Hamilton Standard propeller of 3.99 metres diameter. Fuel capacity 3,137 litres in two wing tanks each comprising 10 cells.

Dimensions: Wing span 29.15 metres; Wing area 84.72 square metres; Length 22.13 metres; Tailplane span 10.97 metres; Height 9.66 metres; Wheelbase 7.29 metres; Wheel track 7.05 metres.

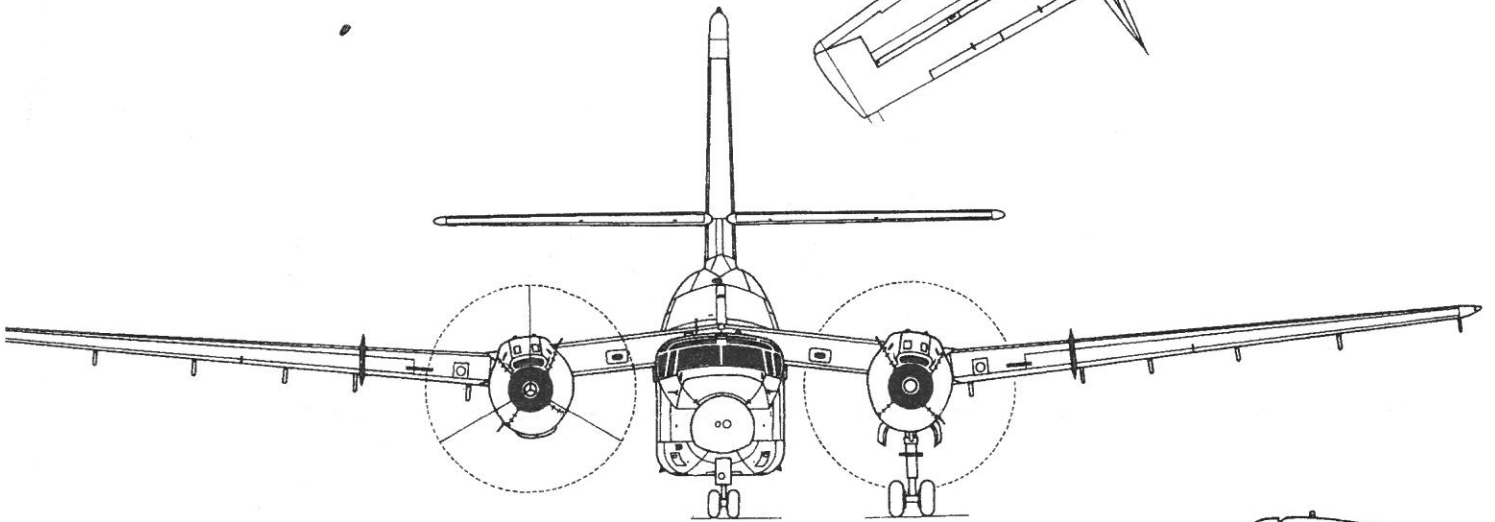

Weights: Maximum take-off and landing 12,927 kg; Operational empty 8,283 kg; Maximum payload 8,740 kg.

Performance: Maximum speed (at maximum take-off weight) 348 km/h at 2,000 metres; Economical cruise 293 km/h at 2,500 metres; Take-off run 221 metres; Landing roll 204 metres; Initial rate of climb 413 metres/minute; Service ceiling 7,560 metres; Engine out ceiling 2,682 metres; Range (with 45 minute reserve at economical cruise) 2,100 km with maximum fuel, or 389 km with maximum payload.

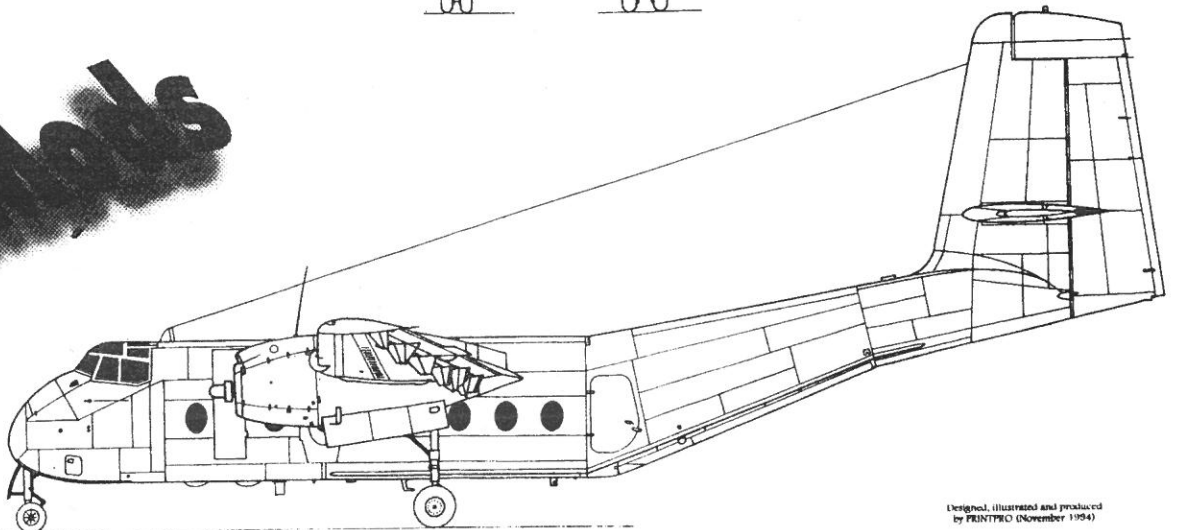

Accommodation: Flight crew of two (plus loadmaster) plus 32 troops or 26 fully equipped paratroops on inward facing seats; or 22 stretcher patients and eight seated patients or medical attendants.

Spanish Air Force DHC-4A Caribou T9-12
Ala Wing 37 Based at Albacete, Spain
1968 - 1991

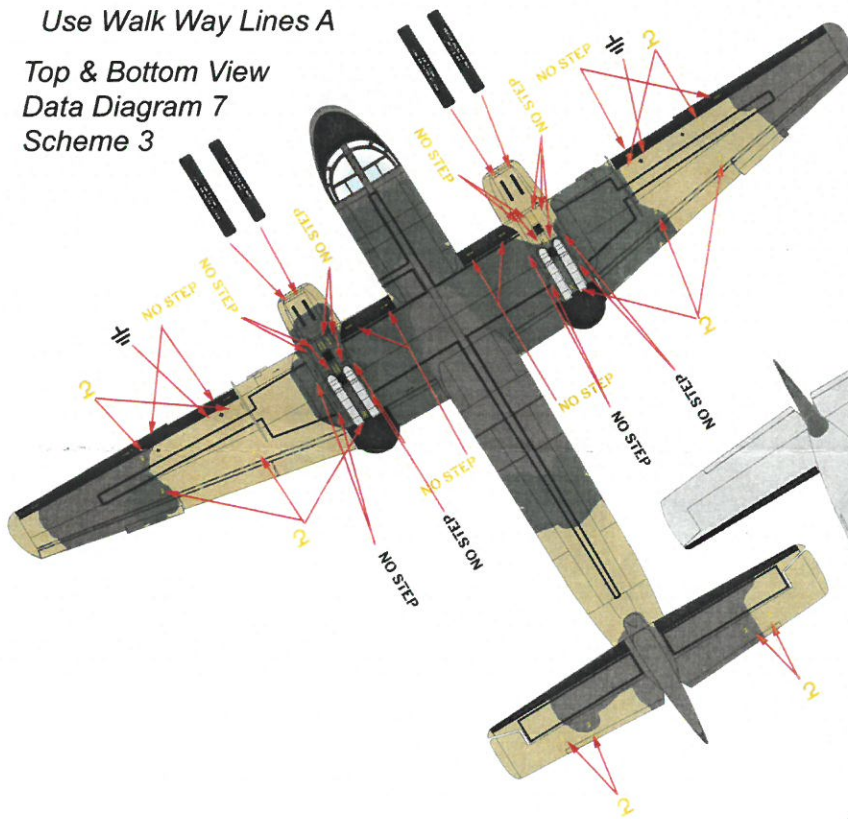

Scheme 3

Note:
This paint scheme is a rough guide,
as these aircraft don't seem to have a set pattern.
This camo pattern was reproduced from images of this aircraft
after it had been decommissioned from the Spanish service.
