

For the best and most thorough reference material available for the F-4, and the only material available in full-color, consult The Modern Phantom Guide, available from Reid Air Publications at www.reidairpublishing.com.

This sheet includes walkways in nearly all color styles commonly found on USAF and export F-4s throughout their service careers. On the upper half of the sheet are decals sized for the Hasegawa kit, while on the lower half are those decals for the new ZM kit.

Individual 'walkway' decals are provided in black and neutral gray to be used within the walkway decals for the upper wing surfaces. Choose the appropriate decal for your subject. Take care when applying all decals, especially those that are only thin stripes, as they may break. Care must also be taken while applying the decals to ensure they fit the drawings and patterns shown at left.
