All of our decals are precisely printed by Microdot. Using Micro-dot and Micro-dot will give you the best results when used with our decals.

Two Accurate, Two Colorful Twoobobs!

WHAT'S OUT THERE?
1/48th Hasegawa AV-8B Harrier II Plus
1/48th Monogram AV-8B
Amraam Line AV-8B Harrier II NA/Plus Conversion
Amraam Line Wing Tanks
Cutting Edge Masks (Monogram)
Eduard Detail Set (Monogram)

Loaner jet from VMA-231. Retains their "Ace of Spades" rudder markings.

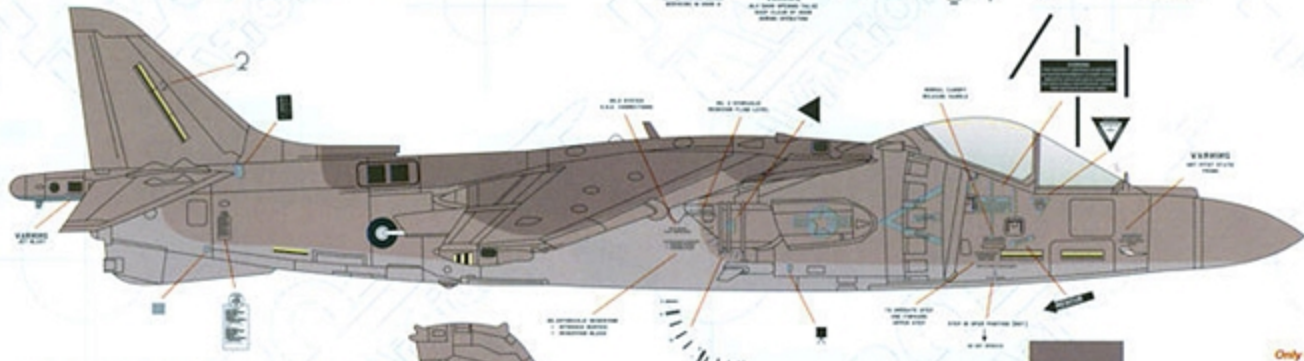

There were two flavors of loadouts that Harriers typically flew with during OIF. These loadouts were carried for 95% of the missions. The loads were optimized for destruction of the enemy and "bring back" capability since they were operating off the ship.

Typically these A/C worked in a four-ship configuration with two of the A/C carrying LiteningII and the other two carrying strictly GBUs.

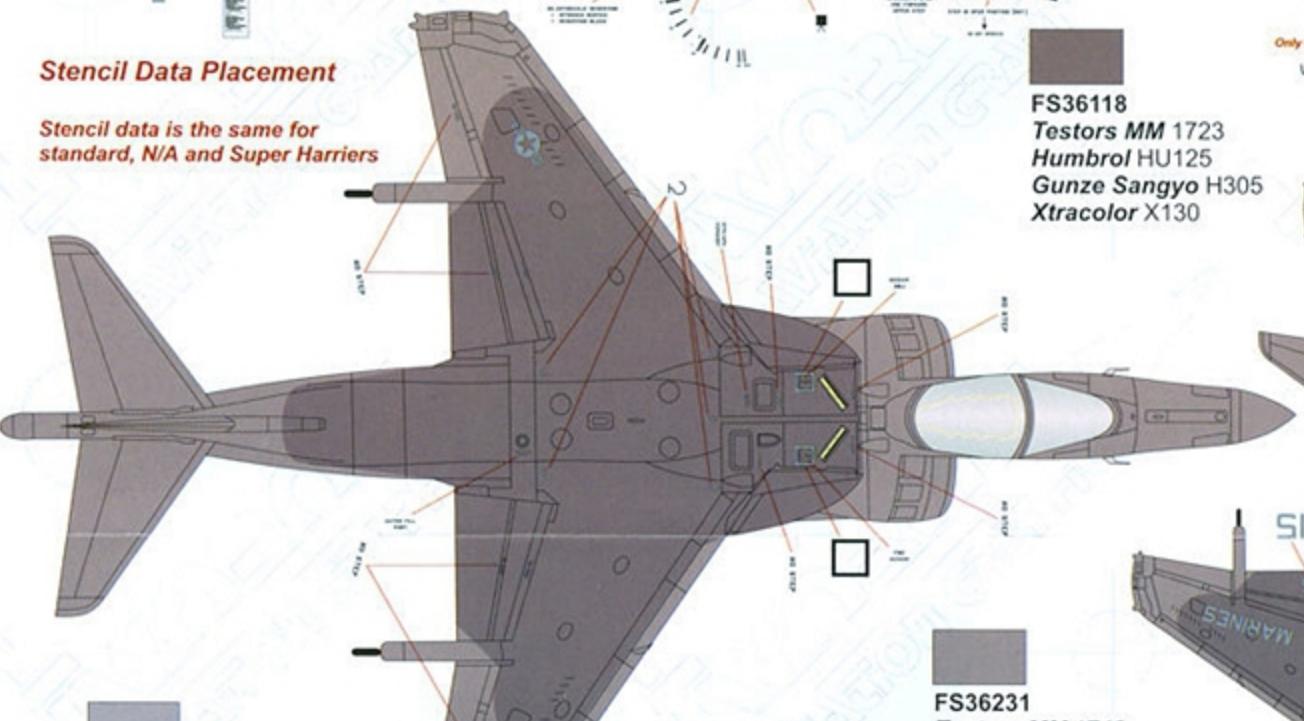

Litening II Loadout: No AIM-9s and no guns; Station 5 - Litening II; Station 2/6 - Wing Tanks; Station 3 - GBU-16 or GBU-12.

Non Litening II Loadout: No AIM-9s and no guns; Station 3/5 - Wing Tanks; Station 2/6 - GBU-12 or GBU-16.

Stencil Data Placement

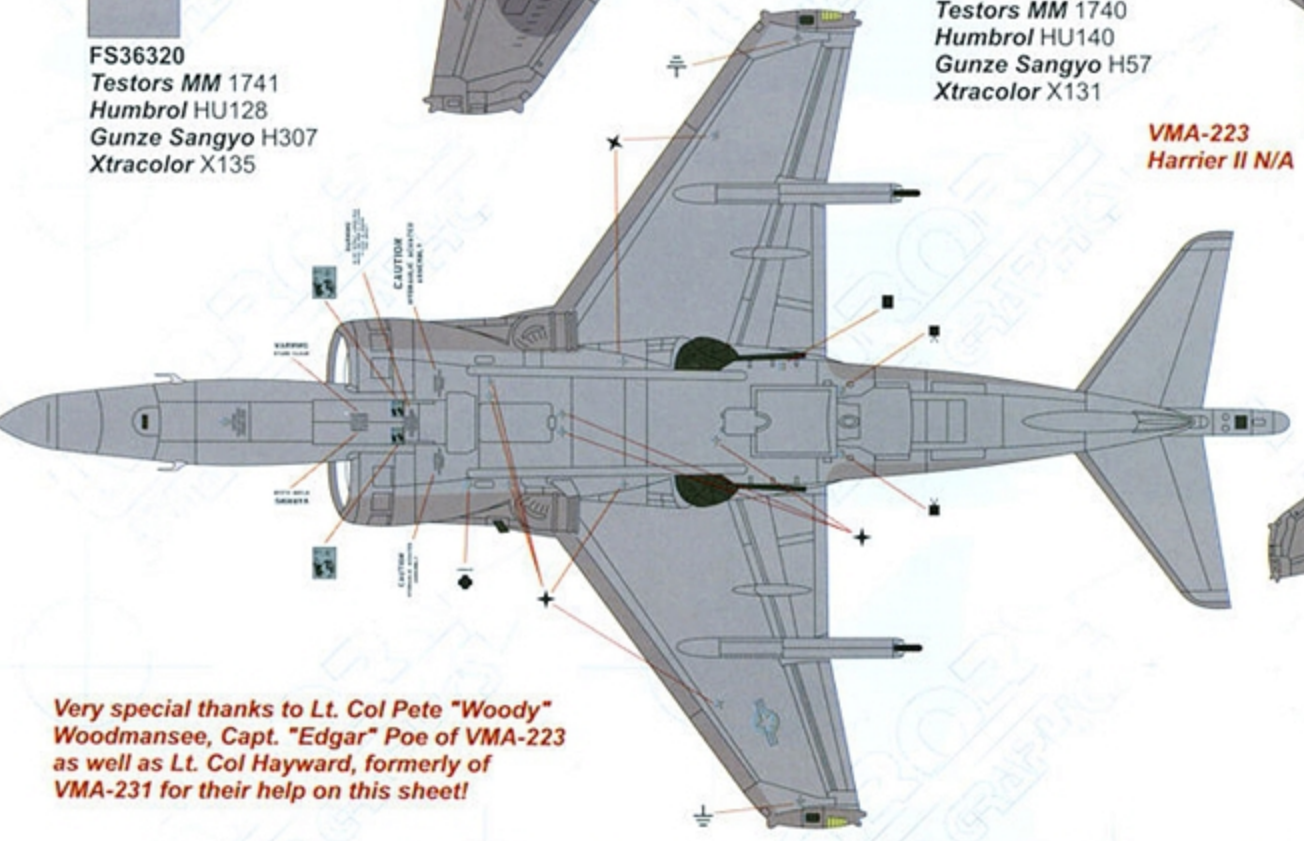

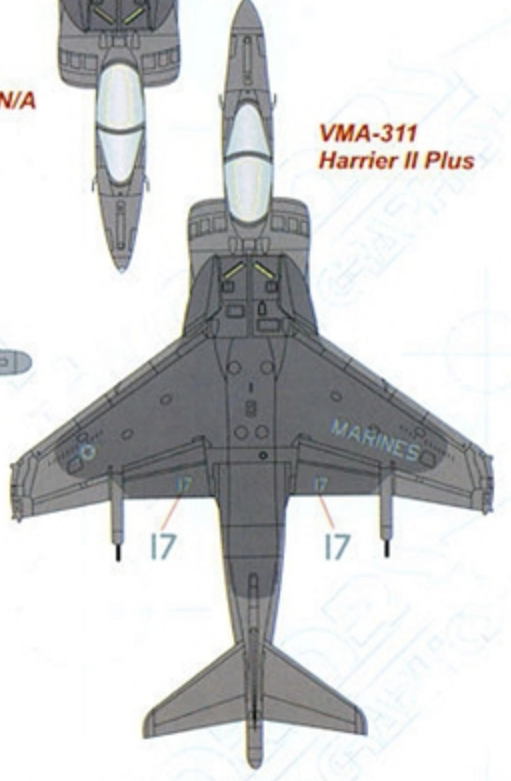

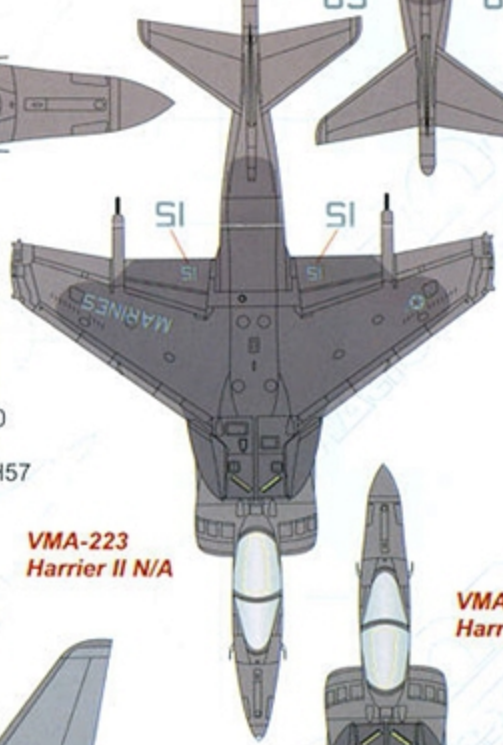

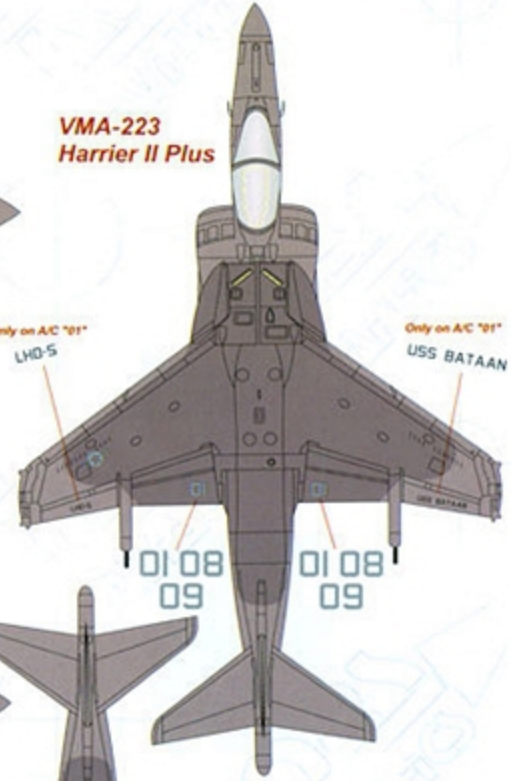

Stencil data is the same for standard, N/A and Super Harriers
