De Rapide werd hoofdzakelijk gebruikt voor het maken van luchtfoto's en karteringswerk. In haar KLM diensttijd was het toestel geheel aluminium geschilderd. Het toestel bestaat voor een groot gedeelte uit gespannen linnen, de motor gondels uiteraard niet. Geef deze verschillen in ondergrond goed weer bij het schilderen of spuiten van het model. Breng de rompedecals aan voordat de vleugels en vleugelstijlen gemonteerd worden.
 Dit toestel werd nu zijn KLM diensttijd tentoongesteld o.a. in Vogelpark Assfauna. Het staat nu in lucht-machtkeuren tentoongesteld in het Militaire Luchtvaart Museum te Soesterberg.
 The Rapide was mostly used for aerial photography and, while flying with KLM it was painted aluminium. Note there was considerable difference in sheen between the metal engine nacelles and the rest of the aircraft which was doped linen. After its KLM service it was displayed in a birdscot but now it has been preserved in the Dutch Air Force Museum at Soesterberg The Netherlands. When building the model be sure to fit wings and struts after decaling the fuselage!
