**BOMB ART**

Some of the sample bomb art included on this sheet was seen in televised reporting of Operation Enduring Freedom from an unidentified aircraft carrier. One publication claims that the captain of USS Carl Vinson prohibited the crew of the carrier and its air wing from applying bomb art to weapons destined for delivery against al-Qaeda and Taliban targets in Afghanistan. However, the sentiments expressed in the bomb art reflect the sentiments of Americans everywhere and, therefore, they are included for the modeller to use at his or her discretion.

**May God bless America!**
