

AJS 37027 Viggen
The Show Must Go On

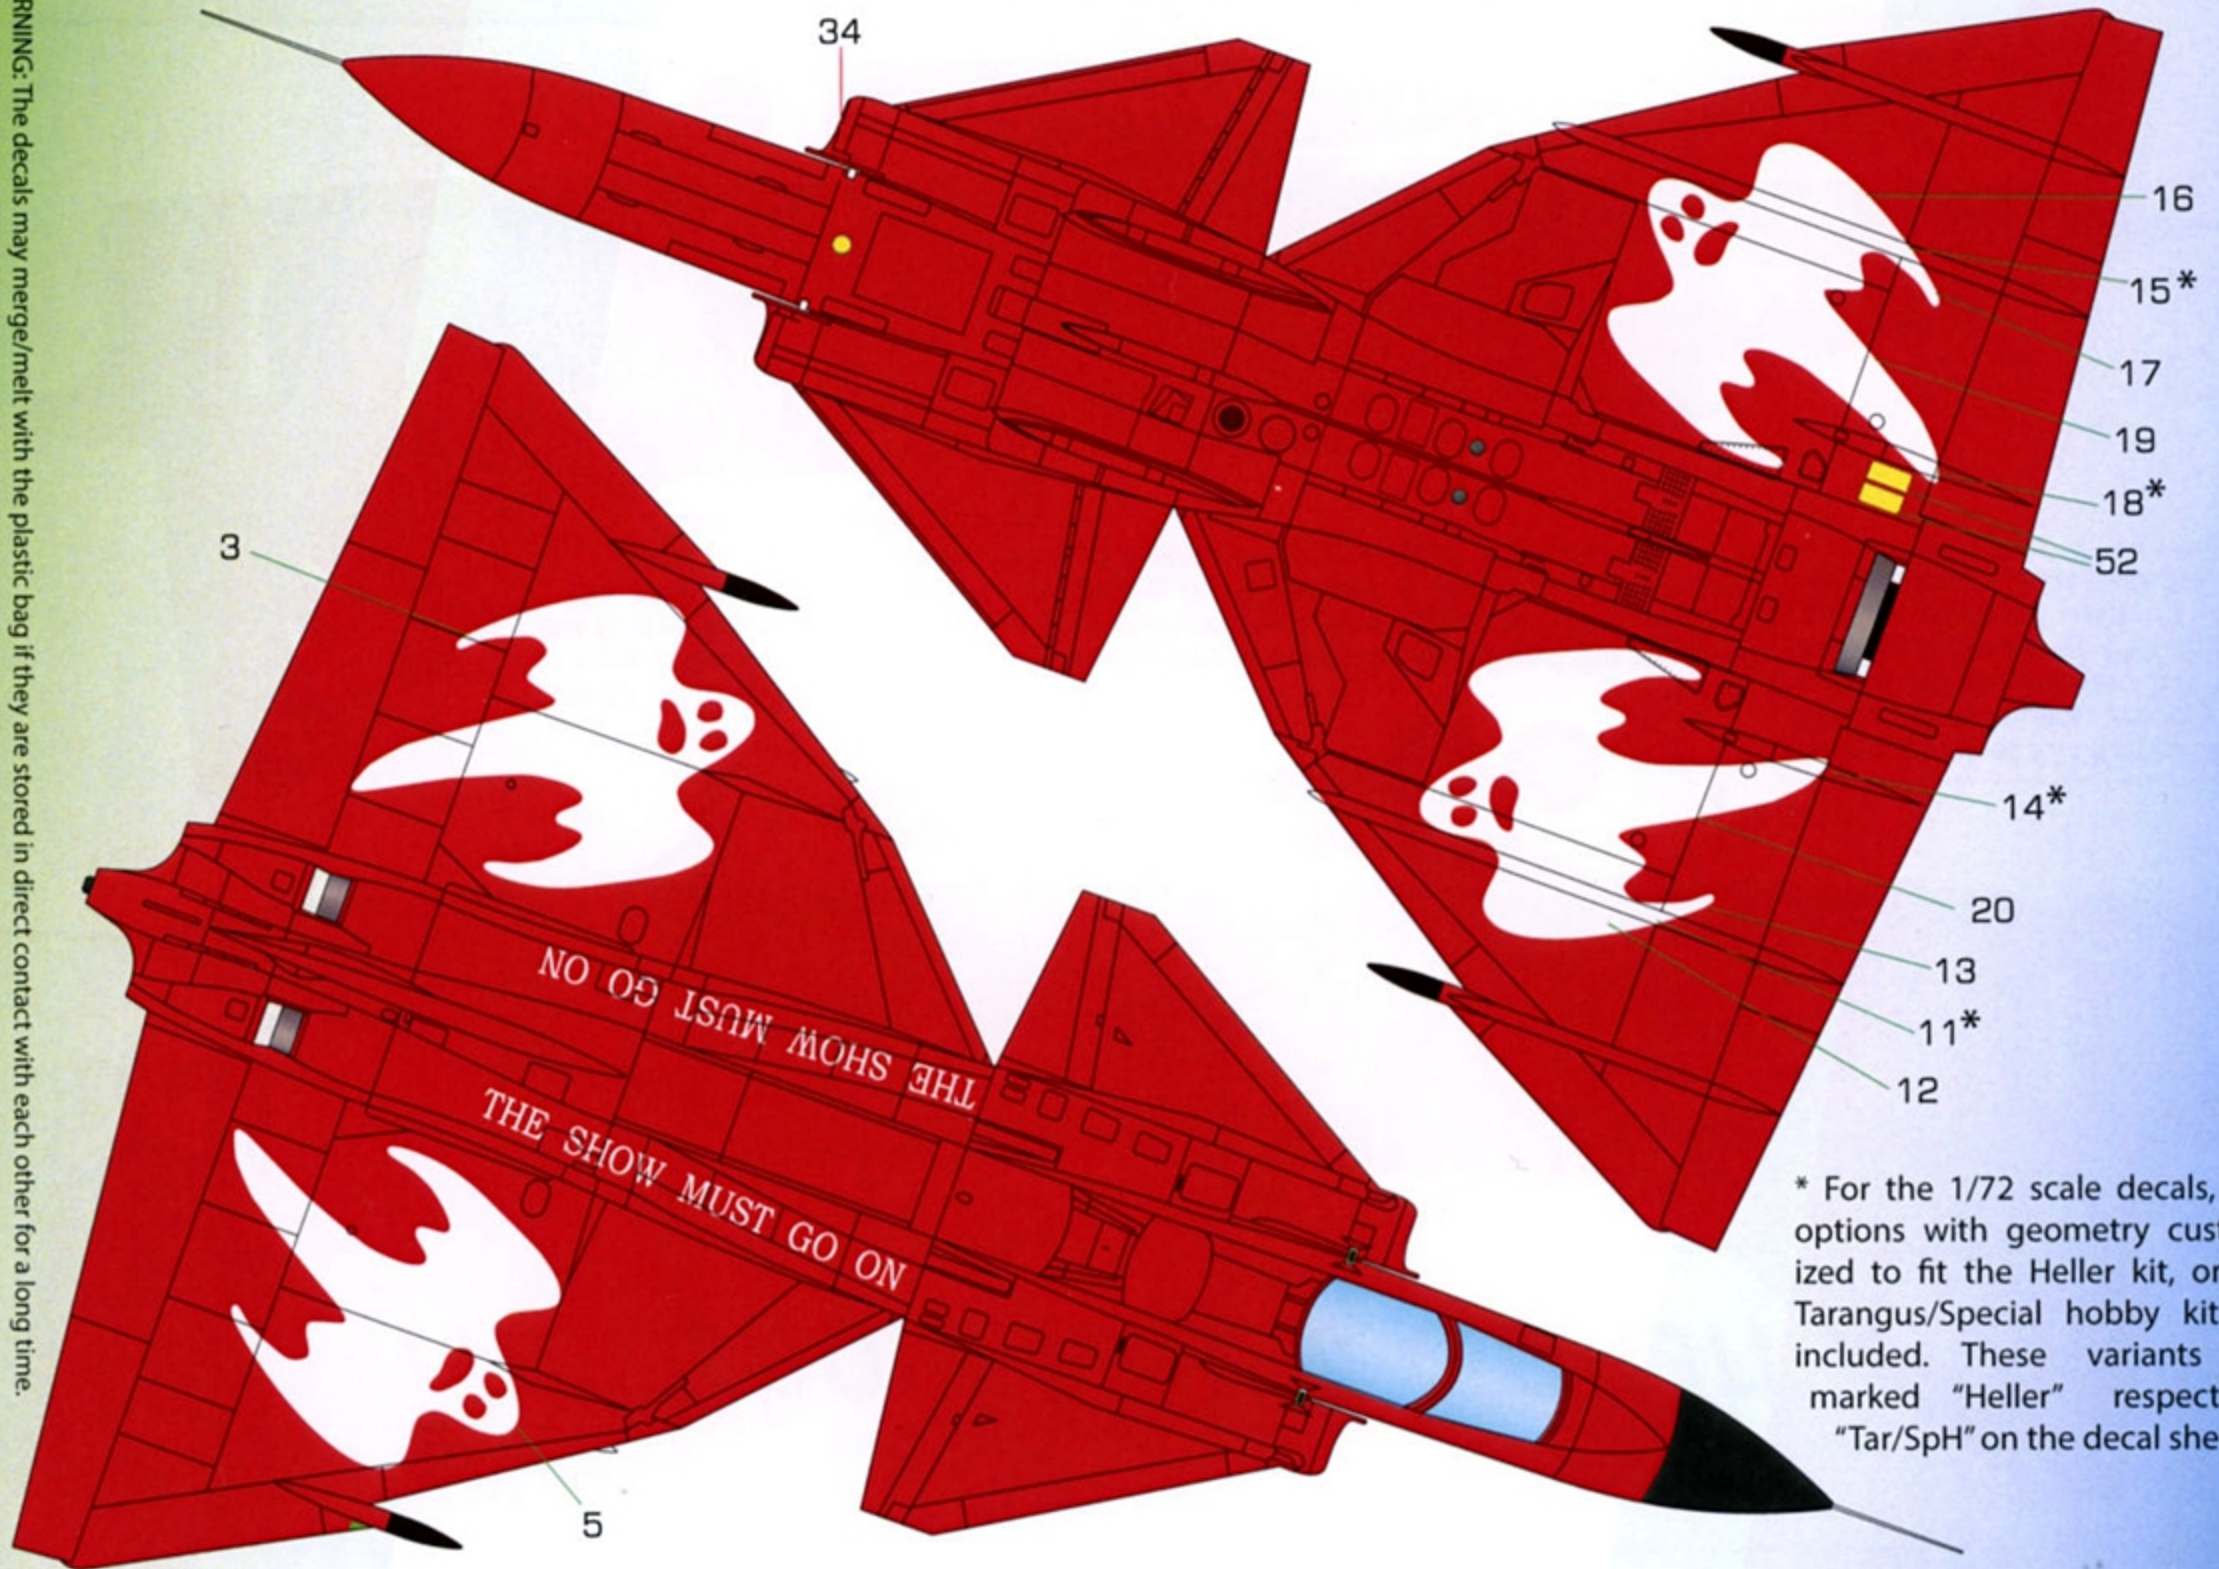

AJS 37, 37027, 57 - F10 Ängelholm.

In early 2000, first squadron at F10 painted this a/c with the ghost and the motto of the first maintenance squadron to mark the transition from Viggen to Gripen. Most of the stencils were painted over. Following its retirement in June 2001 the a/c was flown to the Air force museum at Malmen and in August 2012 moved to to Malmö technical museum.

During a visit at F21 Kallax/Luleå, a sticker with Luleå Hockey was applied on the forward left wheel hub. Back home at F10 this was quickly covered with a ghost badge. Other wheel hubs are white.

It is advised to start with decal 19 and 20 to build up the ghost figure on each side.

* For the 1/72 scale decals, two options with geometry customized to fit the Heller kit, or the Tarangus/Special hobby kit are included. These variants are marked "Heller" respectively "Tar/SpH" on the decal sheet.

WARNING: The decals may merge/melt with the plastic bag if they are stored in direct contact with each other for a long time.
