

Assembly instructions for 1/144 scale **F-4B PHANTOM**

Before assembling model, study sketch carefully. Use cement very sparingly and any excess plastic should be carefully cut away with a sharp knife.

- 1) Cement fuselage halves together.
- 2) Cement canopy over cockpit of fuselage, horizontal stabilizers and exhaust pipe to fuselage tail section and stabilizing fins to both side of fuselage as shown respectively.
- 3) After cementing nose wheel (2 pcs.) to nose wheel strut, cement it to front bottom of fuselage by inserting tabs into corresponding hole of fuselage.
- 4) Cement main wheels to right and left main struts, then cement this assemblies to under side of wings. Cement main wheel doors onto struts.
- 5) Cement missile holders under wings and cement missiles onto holders as shown. Cement main wheel doors (small) to underside of wings as shown.
- 6) Place Decal into water for 1 minute, then place on model. Slowly remove paper by sliding.
